Profile

AI/ML Engineer with hands-on experience in developing and deploying machine learning models, specializing in computer vision applications. Proficient in Python, TensorFlow, PyTorch, and FastAPI, with a strong foundation in data preprocessing, model training, and deployment. Demonstrated ability to collaborate with cross-functional teams to deliver impactful AI solutions. Passionate about leveraging AI to solve real-world problems and continuously exploring innovative technologies.

Professional Experience

08/2025 – Present Remote	AI Engineer <i>Kloudlyn</i> Contributing to the development and deployment of AI-powered service systems and automation solutions, with a focus on backend implementation, AI model integration, and performance optimization.
09/2023 – 08/2025 Kozhikode, India	Artificial Intelligence Developer <i>GJ Global IT Ventures</i> - Developed and deployed machine learning models for applications in computer vision including fracture detection, object recognition, and document data extraction. - Engineered full-stack AI systems using Python, Django, FastAPI, and image processing frameworks. - Mentored student interns, providing guidance on AI tools, model development, and deployment best practices. - Collaborated with cross-functional teams to deliver high-quality projects. - Gained hands-on experience in Python, AI frameworks, and image processing

Education

07/2019 – 08/2022 Maanthavady, India	Diploma in Computer Engineering <i>Government Polytechnic College, Maanthavady</i>
07/2017 – 03/2019 Kozhikode, India	Higher Secondary <i>St. Vincent colony G.H.S.S</i>
06/2016 – 03/2017 Kozhikode, India	SSLC <i>St. Vincent colony G.H.S.S</i>

Skills

Programming Languages

- Python

Databases & Search

- SQL
- Elasticsearch

AI Platforms & APIs

- OpenAI API
- Hugging Face
- Ollama

Frameworks & Libraries

- Django
- PyTorch
- scikit-learn
- OpenCV
- Yolo

AI / ML Domains

- Computer Vision
- LLM & Prompt Engineering

Certificates

Python-Django Fullstack development

Luminar Technolab, Calicut

Languages

- Malayalam
- English
- Tamil
- Hindi

Projects

AI Agent Development for Asset Management

- Developed an AI agent leveraging **Llama 3** to automate asset management tasks, including reviewing overdue assets, scheduling audits for critical assets, and emailing assigned auditors.
- Automated **audit report generation** and task coordination, improving operational efficiency and reducing manual workload.

Valet Parking System (POC)

- Developed the Python backend and customer-facing web application frontend for a valet parking system prototype, enabling efficient vehicle check-in and retrieval processes.

Fracture Detection from Medical images

- Developing an AI-powered system for automated fracture detection in X-ray images
- Training models on diverse X-ray datasets to improve detection accuracy across various fracture types

E-commerce website (POC)

- Built an e-commerce platform with catalog, product listing, and search functionalities using Saleor, Elasticsearch, and GraphQL.

Delivery Sheet Scanning for Gokulam speed and safe

- Automated extraction of data from delivery sheets using Pyzbar, Keras-OCR, and OpenCV, enabling real-time consignment tracking.

Online Repository for Academic Resources Using Ollama

- Created a closed-domain question-answering system utilizing NLP techniques, text summarization, and information retrieval to facilitate access to academic resources.

Face Recognition Attendance System

- Designed a real-time face recognition system using InsightFace and Redis vector database, achieving high accuracy in attendance tracking.

PearlERP

- Implemented number plate recognition and scratch detection using YOLO and OpenCV, streamlining vehicle service center operations.
