Professional Summary

AI Developer & AWS Engineer skilled in **Python, SQL, AWS (EC2, S3, RDS), Flask, Docker, CI/CD, MLOps, Prometheus, and Grafana**. Built and deployed scalable **AI pipelines**, NLP models, and automated workflows, achieving **85%+** workflow accuracy, **40%** team productivity gains, and **30%+** process optimization. **Experienced in containerized, vendor-free AI stacks**, real-time monitoring, and predictive analytics dashboards using **REST APIs, Nginx, Celery, Redis**, and **open-source** models. Passionate about integrating **AI and business strategy** to drive measurable organizational impact.

EXPERIENCE

AI/ML Developer – TeamUp Consultants

Sep 2025 – Present

Tools & Technologies: Flask, Gunicorn, Celery, Redis, AWS RDS, S3, Prometheus, Grafana, Dagger

Salem (On-site)

- Engineered and deployed a **B2B Prospecting tool** that converts search results into valuable contacts.
- Developed a **AI Resume Parser** leveraging NLP for automated candidate profiling, reducing screening time by **40%**.
- Managed a **3-member tech team**, managing backend infra and designing scalable architecture.
- Implemented **conditional workflow pipelines**, enhancing platform adaptability and processing efficiency by **~25%**.

AI Module Lead Engineer (Promoted) – Tienext

July 2025 – Sep 2025

Tools & Technologies: HF Transformers, Docker, Nginx, REST APIs, JSON, CI/CD, EC2, Microservices

Kolkata (Remote)

- Designed and deployed a multi-model AI pipeline using open-source NLP models to improve content moderation accuracy by 25%.
- Deployed containerized MLOps with Docker and Nginx Reverse Proxy, reducing model deployment time by 40% and ensuring 99% uptime.
- Built a cost-efficient, vendor-free AI stack, avoiding paid APIs, slashing operational costs by 60%.
- Developed centralized logging for real-time monitoring, speeding up issue detection by 35%.

Data Science Engineer Intern - Tienext

May 2025 – July 2025

Tools & Technologies: Pytorch, Pandas, NumPy, Transformers, scikit-learn, JSON APIs

Kolkata (Remote)

- Built NLP models with 92%+ accuracy on 25K+ text samples for classification and sentiment analysis.
- Developed microservices that boosted content filtering speed by 30% and reduced latency below 300ms.
- Created reusable data pipelines, cutting preprocessing time by 40% across 3+ ML projects.

AI Developer Intern (Part-Time)– ZEEX AI

May 2025 – Sep 2025

Tools & Technologies: OpenCV, YOLO, Ultralytics, Deep SORT, Roboflow

Nirmaan, IIT Madras (Remote)

- Developed and refined AI models, boosting prediction accuracy by 12% for applications
- Collaborated with cross-functional teams to deliver AI components, meeting 100% of project deadlines.
- Optimized training workflows, reducing computation time by 25% using efficient workflow methods.

Team Manager & Web Content Developer Intern – Bookdio

May 2024 – June 2025

Tools & Technologies: Google Analytics, Google Search Console, CMS

Pune (Remote)

- Led HR and content teams, improving cross-functional response times by 35% as primary PoC.
- Implemented workflow enhancements, increasing team productivity by 40% and reducing delays by 25%.
- Authored SEO-optimized content, driving 7.7K+ Google Search impressions and 195+ web clicks.

PROJECTS

Retail Sales Prediction Dashboard

- Engineered a **Streamlit** dashboard integrating **Linear Regression, XGBoost, ARIMA**, and **LSTM** models, achieving 85% accuracy in sales predictions and enabling data-driven decisions.

Smart Retail Business Intelligence Chatbot (*Alpha Testing*)

- Built a chatbot using **Openrouter API, Transformers** reducing query retrieval time by 30% for **10,000+** sales records.

Amazon Sales Optimization

- Leveraged **predictive analytics** with **Python, Pandas**, and **scikit-learn** to identify sales drivers, increasing revenue by 20%.

Customer Purchase Prediction

- Built a **Decision Tree Classifier** achieving 85% accuracy, enhancing targeted marketing campaigns using **10,000+** customer records.

EDUCATIONAL CREDENTIALS

Master's in Computer Science - Government Arts College (Autonomous), Salem

May 2025

Major: Computer Science, Allied: Mathematics

GPA: 8.44

Coursework: Data Analysis, RDBMS, DAA, Operating Systems, Blockchain, R Programming

Bachelor's in Computer Science - Government Arts College (Autonomous), Salem

May 2023

Major: Computer Science, Allied: Mathematics & Statistics

GPA: 8.18

Coursework: Python, Data Structures, Software Engineering, Java, Web Designing, Networking

Sri Sarada Balamandir Boys Matric Higher Secondary School, Salem

May 2020

Major: Computer Science

SKILLS

- **Technical:** Python, SQL, Power BI, Tableau, HTML/CSS, GitHub, Google Workspace, MS 365
 - **Analytical:** Data Analysis, Machine Learning, Predictive Modeling, Sentiment Analysis, BI
 - **Soft Skills:** Team Collaboration, Communication, Problem-Solving, Multilingual Proficiency (Tamil, English, Hindi, Malayalam).
-

CERTIFICATIONS:

- **Certified Data Analyst - Space Tech** - White Hat Junior.
 - **Career Essentials in Business Analysis** - Microsoft and LinkedIn.
 - **Data Analysis Essentials** – Cisco.
 - **Certification on Artificial Intelligence 101** – IBM.
 - **Networking Essentials** – Cisco.
 - **Core Java** – Thiagarajar Polytechnic College.
-

ACTIVITIES & ACHIEVEMENTS

National Service Scheme: Engaged 200+ secondary school students in educational initiatives (2020-2023)

Class Representative: Facilitated communication between students and faculty, fostering collaboration (2020–2025)

Awards: Proficiency Prize – Top 3 Under 60

HOBBIES: Reading, Trekking, Traveling, Cooking, Cycling
