SKILLS

Technical Skills:

Programming: Python · FastAPI · Flask · React.js · JavaScript · PHP (basic)

Machine Learning: Supervised Learning · Unsupervised Learning · Deep Learning · NLP · LLMs · RAG · Embeddings

Frameworks & Libraries: TensorFlow · PyTorch · Scikit-learn · Pandas · NumPy · LlamaIndex · LangChain

MLOps & Deployment: Docker · Git · Model Serving · CI/CD (basic) · Cloud Platforms (basic)

Tools & Databases: FAISS · Pinecone · PostgreSQL · Data Visualization

Other Skills: Prompt Engineering · Vibe Coding

EDUCATION

Bachelor of Technology in Computer Science

Sahridaya College of Engineering & Technology

2020 – 2024 | Kerala, India

Academic Achievements :

CGPA: 8.18

Class Representative 2021-2022

CERTIFICATES

- Machine Learning with Python – IBM (Coursera)
- Prompt Engineering – Dubai 1 Million Prompts Initiative
- Masters in Data Science – NSDC, Govt. of India

PROFESSIONAL SUMMARY

AI Engineer with practical experience developing LLM-powered systems, RAG applications, ML pipelines, and full-stack developing. Skilled in building and deploying end-to-end AI solutions, integrating models into applications, and collaborating with engineering teams to deliver production-ready features.

EXPERIENCE

Zealogs IT Solutions

Jr. Software Engineer

06/2024 – present | Kochi, India

Remote | 2024 – Present

- Built multiple AI and ML applications including LLM-based chat systems, RAG-powered search, and document intelligence tools.
- Designed and deployed backend services using FastAPI, integrated with React.js frontends.
- Worked on long-term + short-term memory systems for conversational AI, including embeddings, context handling, and retrieval.
- Developed ML pipelines for data preprocessing, model training, evaluation, and iterative improvement.
- Collaborated with data engineers and senior developers to integrate AI features into enterprise applications.
- Deployed containerized applications using Docker and managed production workflows.

Key Achievements:

- Built a long-context AI memory engine using vector search (FAISS).
- Developed a RAG-based PDF QA system using embeddings and Pinecone.
- Created internal automation tools for faster development workflows.

PROJECTS

MemoryGPT – AI Memory Assistant

Built an AI system with long-term/short-term memory, document-aware conversation, and context tracking using embeddings + vector search.

RAG Document QA System

Processes PDFs, stores embeddings (FAISS/Pinecone), and answers user questions accurately using retrieval-augmented generation.

Recommendation & Similarity Engine

Created an embedding-based similarity model for ranking and recommending content.

AI Research Agent

Automated agent capable of reasoning over web results, extracting insights, and generating structured responses.

ADDITIONAL

- Strong debugging and problem-solving skills
- Fast learner with adaptability to new technologies
- Team-oriented communicator with a proactive approach
