SUMMARY

Dedicated B.Tech graduate in Artificial Intelligence and Data Science with a strong background in machine learning and AI technologies. Passionate about ongoing learning and utilizing skills in a dynamic setting to drive organizational growth.

EDUCATION

B.Tech: Artificial Intelligence and Data Science, 08/2020 - 05/2024

KTU University - Pala,India

PROJECTS

Attendance register using Face recognition.

- Integrated with CCTV cameras to automatically capture attendance, ensuring accurate and efficient tracking. The system processes live video feeds, identifies individuals, and logs attendance.
- Engineered an attendance register system utilizing face recognition and the YOLO v8 model, processing live video feeds for real-time identification and automatic attendance logging.

Marketing Boost Using Machine Learning Algorithms.

- Successfully create a system which efficiently classifies items in a supermarket based on association, category and most frequently bought items.
- Mainly it used Apriori Algorithm, Random Forest classifier and Exploratory Data Analysis.

INTERNSHIPS

Intern-Data Scientist, 04/2025 - Current

RP2 - Rounded Professional – Kochi, India

- Exploring new technologies and approaches to streamline processes.
- Gaining hands-on experience in various AI tools, increasing proficiency and expanding technical skill set.

Trainee Software Engineer, 05/2023 - 06/2023

AiROBOSOFT Products and Services – Bengaluru, India

- Company Overview: affiliated with AICTE India
- Contributed to the development of an Eye Blink Sensor during tenure as a Trainee Software Engineer at AiROBOSOFT Products and Services.
- Improved overall system performance by optimizing code and troubleshooting issues during the development process.
- Project executed in an offline environment, ensuring reliability and accuracy in real-world applications.

Intern, 10/2022 - 11/2022

Teachnook – Remote

- Developed a comprehensive Student Management System as part of Aican Automate in collaboration with Teachnook.
- Enabled students to access their data through secure individual logins and provided teachers with a dedicated interface for managing student details and adding marks.

SKILLS

Python

LLM

SQL

Machine Learning

Computer Vision

Deep Learning

NLP

CERTIFICATIONS

Vanderbilt University – Prompt Engineering for ChatGPT.

Python -Kaggle

Intro to SQL -Kaggle

Machine Learning - IBM

Foundation: Data, Data Everywhere-Google

LANGUAGES

English

Malayalam

VOLUNTEER EXPERIENCE

- Attended Hyperplane Event at Tinker HUB.
- Attended a seminar on How to Build career In Software Development by Techasoft.
- Participated in the talk session by TEDxSJCET organised by TEDx.
