PROFESSIONAL SUMMARY

Software Engineer with expertise in Full-Stack Development and AI Engineering. Proficient in Java, React.js, Node.js, Next.js, Express.js, MySQL, PostgreSQL, MongoDB, and AWS for building scalable, user-centric applications. Skilled in deploying Docker, Jenkins, and creating RESTful APIs using FastAPI. Experienced in developing intelligent AI agents with agentic frameworks. Strong programming foundation in Java, C, C++, PHP, and WordPress. As a Senior Software Engineer, adept at leading cross-functional teams, managing end-to-end project lifecycles, and aligning technical solutions with business objectives. Committed to delivering innovative, high-quality solutions and driving business success through technology.

EXPERIENCE

Software Engineer

April 2024 – Present

Full Stack Development

Thopps Technologies, Kochi-Singapore (Hybrid)

- Directed end-to-end project lifecycle as Project Lead, including planning, scheduling, resource allocation, risk management, and stakeholder communication.
- Managed agile software development teams across full-stack and AI projects, ensuring on-time delivery and alignment with business requirements.
- Led sprint planning, daily stand-ups, and retrospectives to improve team collaboration, velocity, and product quality.
- Designed and developed full-stack web applications using React.js, Node.js, Next.js, and Express.js to deliver high-performance user experiences.
- Built scalable backend systems and integrated relational and NoSQL databases, including MySQL, PostgreSQL, and MongoDB.
- Implemented CI/CD pipelines using Jenkins and Docker on AWS infrastructure, improving deployment speed and reliability.
- Developed RESTful APIs with FastAPI to support seamless integration between frontend and backend services.
- Created intelligent AI agents using agentic frameworks for real-time decision-making and automation.
- Built custom CMS platforms and dynamic websites using WordPress and PHP to meet client-specific needs.
- Utilized Redux, Firebase, and Vite.js for efficient state management, real-time updates, and optimized frontend development workflows.
- Deployed scalable cloud-based solutions using AWS services such as EC2, S3, RDS, and Lambda.
- Monitored and optimized database performance, performed migrations, and ensured data integrity across environments.

TECHNICAL SKILLS

Programming Languages: Java, Python, C, C++, PHP

Web & Application Development: HTML, CSS, JavaScript, React.js, Node.js, Next.js, Express.js, Vite.js, FastAPI, RESTful APIs, WordPress

Databases: MongoDB, MySQL, PostgreSQL, SQLite, Firebase, PL/SQL

DevOps & Cloud: Docker, Jenkins, AWS (EC2, S3, RDS, Lambda, Cloudfront, ECR, DNS, API Gateway), Google Cloud Platform

AI & ML Frameworks: AI Agents, Agentic Frameworks

Project & Team Management: Agile, Scrum, Jira, Slack, Bitbucket, Git, Confluence, Project Planning, Sprint Management, Resource Allocation

Tools & Platforms: Git, Postman, VS Code, Eclipse, MS Office Suite, MongoDB Compass, pgAdmin, Postgres

Operating Systems: Windows, Linux

PROFESSIONAL ACHIEVEMENTS & OFFERS

Assistant Systems Engineer (Offer) – Tata Consultancy Services (TCS)

Oct 2024

Successfully selected as Assistant Systems Engineer at TCS through campus recruitment, recognized for strong technical and problem-solving skills.

Implementation Engineer (Offer) – 6D Technologies, Bangalore

Jun 2024

Offered role of Implementation Engineer at 6D Technologies for demonstrating expertise in deployment workflows, telecom domain knowledge, and cross-functional collaboration.

EDUCATION

Master of Computer Applications (MCA)

Oct 2022 – March 2024

St. Joseph's College of Engineering & Technology, Palai, Kerala

CGPA: 8.9/10

Bachelor of Computer Applications (BCA)

Jun 2018 – Sep 2021

St George's College, Aruvithura, Kerala

CGPA: 8.28/10

Higher Secondary Education(Computer Science)

May 2016 – April 2018

St Joseph's Central School, Mundakayam, Kerala

CGPA: 7.3/10

PROFESSIONAL PROJECTS

LiveGreen (Deployment Completed, Ongoing Enhancements)

Client: U.S.-based research lab

Led development of an AI-driven sustainable food research system using Node.js, React, TypeScript, Python, LangChain, OpenAI, and MySQL. Managed CI/CD pipelines with Jenkins and Bitbucket to ensure high availability and deployment automation.

GatePass (Deployment Completed, Ongoing Enhancements)

Client: Automated gate system, Singapore

Directed design and implementation of an AI-powered vehicle recognition and automated gate control system using Node.js, Express, React, Next.js, PostgreSQL, and AWS serverless services (Lambda, EC2, S3). Coordinated integration of real-time image processing and parking slot assignment.

AIQ-Tesseract (Ongoing)

Managed development of an AI-driven chat assistant platform leveraging Python, PostgreSQL, Node.js, AWS EC2/RDS, LangChain, OpenAI, and Docker. Enabled personalized customer support by integrating multiple data sources for real-time interactions.

Wowlyx (Ongoing)

Oversaw creation of an AI-powered video analytics platform for anomaly detection using Node.js, Next.js, Vite, Docker, AWS EC2, PostgreSQL, and Prisma. Implemented scalable, containerized deployments supporting real-time multi-video processing.

Swimmunity (Completed, Deployed)

Client: Thoppan's Swimming Academy, Kerala

Led delivery of an event management system for swimming competitions, automating registration, scheduling, and result tracking. Integrated AI analytics for athlete performance using a tech stack similar to Wowlyx.

ACADEMIC PROJECTS

Hear-Say | Python-ML-JavaScript

Feb 2024– May 2024

- Developed a communication system for deaf and dumb people with normal people using Sign Languages.

Task Management System | Java-MySQL

Oct 2023– Dec 2023

- Live Project - Created a task management system, a web application for an IT firm Infosmart Technologies to enhance the day to day task, project , works completion of employees.

CERTIFICATIONS

Research Paper: Sign Language Interpreter with text and Animation, presented at NCACA 2024

NPTEL Certification:Data Science for Engineers, Internet of Things

Advanced Coursework: Cyber Security Cadet- Ethical Hacking: 2023 Latest Edition. (Udemy), Programming Foundations: Databases(LinkedIn Learning), Learning Java (LinkedIn Learning)

KEY SKILLS

- Project Management
 - Agile & Scrum Methodologies
 - Software Development Lifecycle
 - Leadership
 - Team Collaboration
 - Stakeholder Communication
- Sprint Planning
 - Problem-Solving
 - Critical Thinking
 - Time Management
 - Adaptability
 - Technical Documentation
- Risk Management
 - Continuous Learning
 - Self-Motivation
 - Effective Communication
 - Cross-Functional Team Leadership

LANGUAGES

- 🌐 **English:** Professional Proficiency
 - 🌐 **Malayalam:** Native/Bilingual
- 🌐 **Hindi:** Limited Working Proficiency
 - 🌐 **Tamil:** Limited Working Proficiency
