Alappuzha, Kerala, INDIA

Core Skills

Artificial Intelligence (AI), Machine Learning, Natural Language Processing (NLP), Chatbot Development, Computer Vision, DialogFlow, Python, Pandas, Large Language Model (LLM), GenAI, Langchain, Leadership, Adaptability, Problem Solving, Communication, Time Management, Teaching, Training

Education

Cisco Networking Academy

Jan 2021 – Present

Christ University, Bangalore

Jun 2023 – May 2025

Master of Science – MSc
Artificial Intelligence & Machine Learning

Christ University, Bangalore

Jan 2020 – Jan 2023

Bachelor of Science – BSc Computer Science, Mathematics, Electronics

Miranda Composite PU College, Bangalore

Jan 2018 – Jan 2020

PUC Science (PCMC)

Oxford English High School, Bangalore

Jan 2005 – Jan 2018

SSLC, Karnataka State Board

Languages

English	(4)
Kannada	(4)
Malayalam	(4)
Tamil	(3)
Hindi	(3)

Key Projects

Fr. Francis Chatbot

Dec 2024 - Present

Created a chatbot that can understand the questions and reply as a catholic priest with bible verses from the bible. Using Llama 4 LLM model. Link: <https://giofgod.streamlit.app/>.
Built using: Python, Langchain, Meta AI suite. The same bot is also available on Whatsapp: <https://wa.me/ais/1221402202287405?s=5>.

Online Portfolio

Jun 2025 - Present

Coded an online portfolio using the Streamlit framework in Python and hosted it on their community cloud. Please have a look at it: <https://manumartin.streamlit.app/>.

Analysing Mental Health Data

Dec 2023 - Jan 2024

Analyzed a mental health dataset to predict 'Coping_Struggles' and 'Social_Weakness' using a range of supervised and unsupervised machine learning techniques, including classification models, clustering, and factor analysis. **Built using: Python, Pandas, Matplotlib.** Please have a look at: <https://shorturl.at/TIESB>

Super Smart Blind Stick

Jan 2025 - Mar 2025

A standalone blindstick that observes the surroundings using Computer Vision, interprets them using Yolo and then converts them to speech output using pyttsx3. Powered on Raspberry Pi 4. **Built using: cv2, Raspberry Pi OS (Linux), GPIO, Ultralytics (Yolo8)**

Eva AI Job Butler

Oct 2025 - Present

An automated AI project that utilizes RAG systems to build an intelligent assistant aimed at streamlining job application processes. Developed deep personalization features by integrating resume details into the knowledge base, ensuring dynamic updates from GitHub workspaces. **Built using: Python, RAG, Ollama, Phi-4, Github APIs**

My Projects

<https://github.com/ManuMartinDeveloper>

Experience

Jan 2025 - May 2025

Conversation Designer Intern

Comportement Software PVT LTD

AI Freelancer

May 2025 - Present

MR Technologies

Awards

Mar 2024

First Prize Chatbot Competition

Sri Sai Ram College of Engineering

Certificates

Cognitive Models: Overview of Cognitive Models

Skillsoft

Build a Face Recognition Application using Python

GUVI Geek Networks, IITM Research Park
