

PARVATHY MURALI

Kochi, Kerala, India | +91 7306582213 | parvathymurali28@gmail.com | [LinkedIn](#)

PROFESSIONAL SUMMARY

AI Developer with hands-on experience in building AI tools, internal chatbots, and automation systems for financial institutions.

Specialized in Python, Data Analytics, Deep Learning, and RAG-based solutions. Proficient in developing machine learning and deep learning applications with a strong focus on efficiency and scalability.

PROFESSIONAL EXPERIENCE

Manappuram Finance Limited, Thrissur, India

AI Developer - R&D Department | April 2025 – Present

- **Built an RAG-based internal chatbot leveraging vector databases**, enabling employees to retrieve company circulars **30% faster**, reducing manual search time and improving knowledge accessibility.
- **Designed and implemented a RESTful Flask API for structured chatbot log storage**, resulting in **100% improvement in tracking accuracy** and enabling detailed analytics for user interactions.
- **Automated SDN data extraction and email reporting pipeline** using Playwright for PDF downloads and Python for parsing and generating Excel reports, **cutting manual effort by 90%** and ensuring **real-time reporting with zero errors**.

AI Developer Trainee - R&D Department | June 2024 - April 2025

- Automated PDF data extraction using PyMuPDF, Fitz, OpenPyXL, and RPA, saving ~20 hours/week for compliance teams.
- Built an image classification model to detect fake auction forms and ID photos, reducing manual audits by 70%.
- Developed a chatbot log system with database tracking, logging over 1,000 logins monthly across 5,000+ users.

Luminar Technolab, Kochi, India

Data Science Intern | Jan 2024 - June 2024

- Developed a loan approval prediction model using PyTorch, incorporating PCA for dimensionality reduction and decision boundary visualization to enhance interpretability and performance analysis.
- Led a team project implementing machine learning techniques for business problems.

Wahylab Solutions, Kochi, India

Data Science Intern | March 2023 - August 2023

- Built a 'Credit Card Fraud Detection' system using ML (Random Forest: 99.7% accuracy).
- Developed a deep learning model using Keras for early detection of brain tumors via MRI classification.

EDUCATION

Mahatma Gandhi University, Kottayam, Kerala

Master of Science in Computer Science (Data Analytics) | 2021 - 2023

- Achievements: University 8th Rank Holder, Academic Excellence Award 2023

Bachelor of Science in Mathematics | 2018 – 2021

ADDITIONAL INFORMATION

TECHNICAL SKILLS

Programming: Python, Flask, SQL, R, cx_Oracle, REST APIs

Databases: Oracle DB, FAISS, ChromaDB

Tools: Excel, Power BI

Concepts: Data Analytics, Machine Learning, Deep Learning, Image Classification, RAG Architecture.

CERTIFICATIONS

- Data Science with Python - Wahylab Solutions

- Python for Data Science - Analytics Vidhya

- Internship Certificate - Luminar Technolab

- NACTET Certified in Data Science

- Certified in Advanced Artificial Intelligence and Machine Learning- ICT Academy

SOFT SKILLS

Logical Thinking, Leadership, Presentation, Observation, Decision Making, Multitasking

LANGUAGES

Fluent: Malayalam | Proficient: English, Hindi
