Skills

Languages: Python, SQL, JAVA, HTML

Technologies & Tools: LLM, RAG, PostgreSQL, Livekit Framework, VectorDB (PGVector, Faiss), PineconeDB, Docker, Git, HUMAIN LLM Model, ALLAM LLM Model, OpenAI Realtime Models, Twilio Realtime transition, AI Voice and Chat agents' development tools, Asynchronous Programming, ASR Models, Deep gram, Speechmatics, Open AI Whisper

Work Experience

LarkLabs.ai, Calicut

May 2025 - Present

AI Engineer (Developer)

- Developed and deployed AI Voice and Chat Agents using OpenAI Realtime Models, Livekit, and Twilio, integrating with PostgreSQL (PGVector, Faiss, PineconeDB) and RAG-based LLM architectures for intelligent data retrieval and interaction.
- Handled vector and embeddings on Realtime Query handling through live calls, using Livekit agents framework
- Mentored and trained junior AI interns, guiding them through AI model integration, database-driven workflows, and real-time voice application development to strengthen team capability and innovation.

Beau Roi Technologies, Chennai

Oct 2024 - Mar 2025

AI & ML Engineer

- Worked on migrating ML workflows to Native AWS, enabling automated scalability based on workload demands and improving the logging and troubleshooting capabilities.
- Developed and deployed AI-driven face recognition systems for secure identity verification using deep learning models integrated with AWS cloud infrastructure.
- Designed and implemented an automated exam paper valuation system leveraging computer vision and NLP techniques to improve grading accuracy and efficiency.

Talent Hunt, Coimbatore

Aug 2023 - Jun 2024

Technical Mentor

- Trained and mentored students and junior engineers on **AI development, cloud computing, and full-stack deployment** using **AWS, Docker, and Git** for real-world project readiness.
- Conducted hands-on workshops on **LLMs, RAG architectures, PostgreSQL, PGVector, Faiss, PineconeDB, and DynamoDB**, guiding learners in building scalable **AI-driven data systems**.

Education

Course Name	Board/University	Institution Name	Year of Passing	Percentage/CGPA
UG-BTech-AI&DS	Anna University	Nehru Institute of Engineering and Technology	2025	7.87
12 th	State Board-Tamil Nadu	Senthil. Matric. Hr. Sec. School	2021	88%
10 th	State Board-Tamil Nadu	Senthil. Matric. Hr. Sec. School	2019	85%

Project and Features Work

1. Title: AI Audio and Voice Input Processing

- **Platform Used:** Python, LiveKit, Deepgram, OpenAI Whisper
- **Period:**03/2025–05/2025

Built a speech-to-text system for real-time voice input handling, enabling users to interact with AI agents through natural voice commands. Integrated with GPT for generating voice-based intelligent responses.

2. Title: User Authentication and Role Management System

- **Platform Used:** FastAPI, PostgreSQL, JWT Authentication
- **Period:**02/2025–03/2025

Implemented a secure authentication system supporting admin and user-level access. Developed token-based login, signup, and session validation for API endpoints to ensure secure user data handling.

3. Title: AI Embedding and Vector Search Engine

- **Platform Used:** Python, FAISS, pgvector, OpenAI Embeddings
- **Period:**03/2025–05/2025

Developed a semantic vector-based search system that converts data into embeddings for faster similarity search. Implemented GPU-based FAISS indexing for efficient data retrieval and ranking.

4. Title: Project Status Retrieval System

- **Platform Used:** FastAPI, PostgreSQL, GPT
- **Period:**04/2025–05/2025

Designed an automated project tracker to fetch real-time project statuses from a structured database using natural language queries. Integrated GPT for interpreting user queries and returning summarized project updates.

5. Title: Live AI Agent with Voice Interaction

- **Platform Used:** LiveKit Agents, Python, Deepgram, GPT
- **Period:**04/2025–06/2025

Built a real-time AI voice agent capable of understanding user voice commands, generating SQL-based responses, and communicating results back through speech output for hands-free database interaction.

6. Title: AI Training Data Manager

- **Platform Used:** PostgreSQL, Python
- **Period:**03/2025–04/2025

Developed a database system to store, manage, and update AI training data and embeddings. Ensured scalability and data consistency for continuous model improvement and retraining workflows.

7. Title: Voice-to-SQL Automation Pipeline

- **Platform Used:** Python, GPT, PostgreSQL
- **Period:**05/2025–06/2025

Implemented an automated system that converts spoken user queries into structured SQL commands. Integrated voice recognition and GPT-based language understanding to enhance accessibility for data retrieval.

Awards and Certificates

- **Mentor at Talent Hunt:** Helping students and working professionals to get better at problem solving, coding and system design
- **AWS ON Cloud Computing** - Skill Vertex
- **Deep Learning** – Internshala
- **Deep learning** – NSDC || Skill India Certificate
- **Smart Glaucoma Predictor using Deep learning** – Innovation and Entrepreneurship Development Centre.

Additional skills and Achievements

- **Students event organizer and Coordinator for 4 years** – NGI
- **Best Event Organizer and coordinator** - NIET
- **Pageant / Fashion event coordinator** – Aura Fashion Academy

Hobbies

- Reading Books
- Art works
- Basket Ball
- Chess
- Learning fresh updates on Tech Fields

Personal Details

- Date of Birth: 30/10/2003
- Father's Name: Kumaresan M
- Address: Calicut, Kerala

Declaration

All information provided in this resume is accurate and truthful to the best of my knowledge.

Date:

Place: Calicut
