Objective

Results-driven AI/ML & GenAI Developer with a B.Tech in Computer Science and professional experience at Tata Consultancy Services. Skilled in designing and deploying Agentic AI workflows, LLM-powered chatbots, forecasting models, and scalable cloud-native solutions on Microsoft Azure. Hands-on expertise spans time-series forecasting, RAG pipelines, AutoML, and enterprise AI deployment with a strong foundation in Python, SQL, and system administration. Certified in Microsoft Azure (AI Engineer, Data Scientist, Solutions Architect, Administrator, Developer) along with TCS internal certifications in Generative AI, Python, and Agile methodologies. Recognized for problem-solving, reusable code development, and performance optimization, with a proven track record of delivering AI solutions that enhance business efficiency and scalability.

Technical Skills

- Agentic AI, GenAI, LLM, RAG, Forecasting & Prediction, ML, AutoML, Azure ML Studio, Azure Service Bus, Cloud-Native AI Deployments, Performance Optimization, Reusable Code Development, Chatbot Testing, Agile, Conversational AI, Reinforcement Learning, TensorFlow, PyTorch
- Java, C, C++, Python, SQL, Python, JavaScript, HTML, XML, JSON, JQuery
- NetBeans IDE, Adobe Photoshop, Adobe Premiere Pro, Adobe Dreamweaver, Autodesk AutoCAD

Experience

- **TATA CONSULTANCY SERVICES** 26-10-2023 - Present
SYSTEM ENGINEER - AI/ML & GenAI Developer
 - Architected and deployed Agentic AI solutions including advanced LLM-powered chatbots, RAG pipelines, and document intelligence systems on Azure.
 - Researched and innovated on time-series forecasting models using Prophet & Azure AutoML, improving POS machine onboarding predictions and delivering insights via PowerBI.
 - Researched, experimented with multiple forecasting models and validated accuracy across datasets, mimicking research-based evaluation.
 - Explored and worked on Generative AI solutions with embeddings, knowledge graphs, and RAG pipelines - areas overlapping with ongoing AI research.
 - Engineered scalable, low-latency AI Pipelines using Azure Service Bus ensuring robust and concurrent request handling for enterprise-grade performance and scalability
 - Developed reusable AI components for embeddings, indexing, and automated test generation, reducing development effort and improving maintainability.
 - Conducted extensive chatbot testing & validation, ensuring accuracy, reliability, and enterprise-grade scalability.
 - Contributed to other use cases like Engg. & Safety Bot and Video Encoder Usecase
- **PRANATHMAKA CONSTRUCTIONS** 13-07-2023 - 21-10-2023
SYSTEM ADMIN
 - Managed and maintained the IT infrastructure of the firm, including desktops, laptops, and office systems and administered networking setup, CCTV monitoring systems, and data backup procedures to ensure smooth operations.
 - Handled software installations, system troubleshooting, and hardware maintenance, ensuring minimal downtime and provided technical support for staff, improving IT efficiency and operational productivity.
- **PRANATHMAKA CONSTRUCTIONS** 15-03-2020 - 19-11-2020
SYSTEM ADMIN (PART TIME)
- **KELTRON** 20-11-2020 - 26-11-2020
INTERN - NETWORKING
- **3G IRPS, IITM RESEARCH PARK** 23-12-2019 - 30-01-2020
INTERN - CYBER SECURITY

Projects

- **POS AI Research**
Conducted comparative experiments with Prophet and AutoML, testing 3/6/7/8-month training windows for accuracy, achieving highest accuracy in long-window forecasting.
- **Gen AI Research**
Designed SSI-Bot and automated testing framework with embeddings and PostgreSQL, simulating real-world research evaluations.
- **IOT-DE NPD Project - 2023**
Projects done at TCS as a part of their initial training. A new product which is non-existent in the present market is developed. Developed an Integrated Food Quality Assurance Device which can be implemented at Government and other Schools where food is provided to the students.
- **Portable DC Fast Charger - 2024**
Project under development which is aimed at developing a portable DC Fast Charger for EVs which will drastically reduce the charging time at remote places.
- **Low Cost Voice Controlled Wheelchair - 2023**
A low-cost mechanism developed for converting any ordinary chair into a wheelchair and controlled with voice inputs. Done as part of the B.Tech Curriculum
- **Comprehensive College Management System - 2022**
A multi-faceted desktop application using Java (Swing) and MySQL to streamline college administrative and academic tasks. The system featured distinct modules with role-based access for Students, Faculty, and Administrators to manage course registration, attendance tracking, grade reporting, and user accounts, centralizing data for improved efficiency.
- **Tours & Travels Management System - 2018**
Project done using NetBeans IDE, Java, and MySQL as a part of the Higher Secondary Curriculum. Functionalities like Ticketing, Room Booking, etc are provided.

Certifications

- IIT Kharagpur AI4ICPS Certification
- Microsoft Certified AI Engineer Associate
- Microsoft Certified Azure Data Scientist Associate
- Microsoft Certified Azure Database Administrator Associate
- Microsoft Certified Azure Developer Associate
- Microsoft Certified Azure Administrator Associate
- Microsoft Certified Azure Solutions Architect Associate
- E2 Generative AI, E2 Python - TCS
- E1 Agile, E1 Rigor in Operations (RiO)- TCS
- Software Security Assurance - TCS
- Graduate Employability Enhancement Program (GEEP) - GTEC
- Adobe Photoshop - GTEC

Education

Course / Degree	School / University	Grade / Score	Year
B.TECH COMPUTER SCIENCE	INDIRA GANDHI INSTITUTE OF ENGINEERING AND TECHNOLOGY	69.6%	2019-2023
HSC	AMRITA VIDYALAYAM	78 %	2018
SSLC	AMRITA VIDYALAYAM	96 %	2016
