Projects

➤ **Integrated Enterprise Management System**

- **Description** : Architected and managed a comprehensive enterprise-level ERP application integrating core organizational functions encompassing HR, Project Management, Finance, Asset Management, and Sales, Ticketing System along with a CRM module. Additionally, developed a Time Tracker application incorporating features such as time tracking, activity monitoring, screenshot capturing, and more. Ensured seamless operations and optimized efficiency to drive organizational success and growth.
- **Key Responsibilities**:
 - **System Integration and Maintenance** : Lead the seamless integration and ongoing maintenance of the application.
 - **Team Coordination and Leadership** : Manage a cross-functional team of 20 members, ensuring cohesion, high performance, and alignment with project goals.
 - **Data Management and Security Oversight** : Implement robust data management practices and security measures to protect organizational data within the application.
 - **Project Planning and Execution** : Develop comprehensive project plans and milestones, monitor progress, and ensure timely delivery of project objectives.
 - **Continuous Improvement Initiatives** : Drive initiatives to enhance application performance, usability, and functionality based on user feedback and technological advancements.

➤ **E-commerce Search Application**

- **Description** : Developed an advanced search application for e-commerce platforms to enhance the user experience by providing accurate and relevant product search results.
- **Key Responsibilities**:
 - **Search Algorithm Development** : Designed and implemented algorithms to return most relevant products based on user search keywords.
 - **Rule-Based Customization** : Create a rule-based system to modify and prioritize search result according to the business needs.
 - **Machine Learning Integrations** : Utilized machine learning models to identify and recommend similar products, enhancing the user's shopping experience
 - **Performance Optimization** : Optimized search queries for faster response times and efficient resource usage.
 - **User Interface** : Collaborated with the front-end teams to integrate the search application, ensuring seamless user interaction.
