SUMMARY

Dedicated Software Developer with expertise in modern JavaScript frameworks and libraries, specializing in Node.js (NestJS, Express), React, Redux Toolkit, JavaScript (JS), and TypeScript (TS). Demonstrated success in building scalable, high-performance applications with a focus on clean, maintainable code and seamless user experiences, deploying applications on VPS servers.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

March 2023 - Present

SMEC Automation Private Limited | Kochi

1. SMEC ERP System

- Successfully led the development of a comprehensive ERP solution for SMEC Automation Pvt. Ltd., integrating key modules:
 - Enterprise Resource Planning (ERP): Unified business processes for efficient resource management.
 - Customer Relationship Management (CRM): Improved customer interaction tracking and service delivery.
 - Human Resource Management (HRM): Streamlined HR workflows, including employee management and payroll.
 - Project Management System (PMS): Enabled seamless tracking of project timelines, tasks, and deliverables.
- Ensured a scalable, user-friendly platform, resulting in increased operational efficiency and better decision-making across departments.
- Led a team of developers through technical guidance, code reviews, and agile methodologies to deliver the project on time.

2. Kerala KSEB Asset Maintenance System (CMMS & PMS)

- Directed the development of an integrated asset maintenance system for Kerala State Electricity Board (KSEB):
 - CMMS: Designed functionalities for asset tracking, maintenance scheduling, and automated work orders.
 - PMS: Incorporated project timeline and task management tools, offering real-time performance insights.
 - Data Analytics: Delivered reporting features with actionable insights to support decision-making.
 - Technologies Used: Full-stack development with React.js, Node.js, and MySQL for a robust, responsive system.
- Championed real-time monitoring and fault detection features, significantly reducing downtime and optimizing resource utilization.
- Provided mentorship to junior developers, ensuring adherence to coding standards and architectural principles.

3. Pooja Booking E-commerce Platform

- Conceptualized and developed a niche e-commerce platform tailored for booking religious services such as pujas, homams, and astrology consultations.
- Designed an intuitive interface for seamless user interaction, enhancing customer satisfaction and boosting service adoption.
- Integrated secure payment gateways and multi-device compatibility, ensuring a smooth and scalable user experience.
- Played a pivotal role in ensuring the platform's technical scalability to accommodate growing user demand and traffic.

4. Document Management System (DMS) with Hierarchical Validation

- Architected and implemented a scalable DMS featuring:
 - Hierarchical Validation: Enabled document submission and approval workflows based on user roles.
 - Automated Notifications: Ensured transparency and timely action through email and in-app alerts.
 - Role-based Access Control: Strengthened data security by granting access based on organizational hierarchy.
- Delivered a user-centric system that enhanced compliance, reduced manual errors, and streamlined document management.
- Partnered closely with stakeholders to align system capabilities with organizational needs.

5. KSEB Display System

- Designed and implemented a real-time data display system for KSEB using Node.js and Socket.io for seamless data updates.
- Developed a dynamic dashboard to provide real-time visibility of critical metrics and operational data.
- Ensured system reliability and responsiveness, contributing to improved information dissemination and stakeholder engagement.

Key Leadership Contributions:

- Provided end-to-end project guidance, from requirement gathering and system architecture to development and deployment.
- Collaborated with stakeholders to define project goals, milestones, and deliverables, ensuring alignment with business objectives.
- Fostered a culture of innovation and learning by mentoring team members and encouraging knowledge-sharing sessions.
- Managed project timelines, resources, and risks effectively, ensuring delivery within budget and schedule.

Junior Software Engineer
Optilogic Technologies | Trivandrum

Jan 2022 - Feb 2023

- I have developed the front end of a Online game using HTML5 Canvas and JavaScript this game was developed for Agave Gaming. I have created a JavaScript plugin to implement the checkout functionality for Omni Portal. This was done using HTML, CSS and JavaScript.
- Worked in ICP project (Omni portal and OAB) for various services like a Debit Card, Credit Card form filling for OAB using Node JS, Encrypted JavaScript.
- Worked in Omni Portal project there i added services like transaction listing for merchants(I created endpoints for listing, create, edit and delete operations for the latest transaction for a particular merchant),Implemented a filter for getting customer details from DB.
- Created a license information section for OAB(All CRUD operations performed),implemented end points for transaction report by quarter, implemented CRUD operations for API keys for merchants similar to API key merchant processor CRUD operations and some other services for the same.
- Worked in a performance analysis project (based on stocks) there implemented charts based on API calls and drawn the results in graphical format using react-chartjs-2 library using React.

SKILLS

Node(Express, nest)
MySQL
JavaScript

React
Typescript

VPS server setup
Redux tool kit

EDUCATION

Bachelor of Technology
• MG University

2012 - 2016

ACHIEVEMENTS

- **Organized Tech fest event:**

Coordinated and executed multiple events as a host for the college's annual tech festival.

- **Lead School house team**

Collaborated with team members to develop event ideas, and secured sponsorships and speaker commitments to ensure the success of each event.

- **IEEE student member**

Organised a workshop on robotics at Sree Narayana Gurukulam College of Engineering under IEEE.
