EXPERTISE

- Proficient in:** Python, JavaScript, HTML, CSS,
- Frameworks and libraries:** Django, jQuery, React, Bootstrap, Sass
- Databases:** PostgreSQL.
- Tools and software:** Git, Visual Studio Code
- Web servers:** Nginx, Apache
- Web Scraping, Celery, Caching Strategies
- Message broker:** redis, kafka
- Jenkins, Docker (Basic)
- AWS:** S3, EB, RDS
- Digitalocean

PROFILE

I am a Python Django developer with over 3 years of experience in building robust web applications. Proficient in backend services, microservice architectures, and frontend technologies, I also have experience with various DevOps tools for seamless deployment. Passionate about creating scalable solutions, I stay updated with industry trends to deliver user-friendly applications that meet client needs.

WORK EXPERIENCE

Senior Software Engineer| June 2023 - Present

Ruppells Solutions pvt ltd

2023-present

- Technical Leadership:** Spearheaded teams in the development and deployment of Python Django applications mainly an elearning platform(IIm), ensuring adherence to best practices and project timelines.
- Ensured adherence to best practices in ERD and database design, optimizing application performance and data integrity.
- Mentorship and Education:** Provided guidance and training to interns and students, fostering a culture of continuous learning and skill development.
- Cloud Infrastructure Management:** Managed server operations on AWS and Digital Ocean, optimizing performance and ensuring high availability of mission-critical applications.
- Utilized web scraping techniques to gather and analyze data, contributing to business intelligence efforts.
- Ensured seamless payment processing and transaction handling through robust gateway integrations, adhering to security standards and regulatory requirements.
- Conducted educational seminars and workshops for college students, promoting knowledge sharing and industry awareness.

Python Django developer | Aug 2021-June 2023

Stey pvt ltd

2021-2023

- Develop RESTful APIs for the front-end team to consume using Django Rest Framework.
- Uses microservice architecture.
- Successfully hosted and maintained a high- traffic website on DigitalOcean using Nginx as the web server, ensuring high availability and fast response times.
- Configured and optimized Nginx for maximum performance, including implementing caching, load balancing, and SSL encryption for secure connections.
- Collaborated with developers and designers to deploy updates and new features to the website, using Git for version control

EDUCATION

Btech in Mechanical Engineering

KTU University

2015-19

PROJECTS INVLOVED

ILM - E-Learning Application

- Developed backend services for an e-learning platform using Python and Django.
- Implemented real-time features with Django Channels and asynchronous task management with Celery and Celery Beat.
- Integrated multiple payment gateways for seamless transactions.
- **Technologies:** Python, Django, Celery, Celery beat, Django channels, RESTful APIs, Redis

CRM Application

- Developed a comprehensive CRM solution to manage customer interactions and data.
- Built backend services using Python and Django for efficient data processing.
- Implemented user authentication, role-based access control, and reporting features.
- **Technologies:** Python, Django, Celery, Celery beat, RESTful APIs, Web scrapping

Steyp E-Learning Platform

- Designed and implemented an e-learning platform utilizing a microservice architecture for scalability and flexibility
- Implemented RESTful APIs for seamless communication between services and front-end applications.
- **Technologies:** Python, Django, Celery, Celery beat, RESTful APIs, Microservice, Redis

DECLARATION

I hereby declare that the facts given above are genuine to the best of my knowledge and belief.
