PROFILE

Aspiring Data Scientist with expertise in machine learning, data analysis, and AI solutions. Proficient in leveraging data-driven techniques to solve complex problems and enhance decision-making. Experienced in predictive modeling, algorithm development, and data visualization.

TECHNICAL PROFICIENCY

- Languages and Libraries : Python | HTML | CSS | Pandas | Seaborn | Numpy | Matplotlib
- Development Tools : Visual studio code | Pycharm | Jupyter Notebook | Excel

EXPERIENCE

Software ENGINEER Intern, Future Optima It Solutions

Aug 2024

- Data science with AI
- 15th August 2024 – Present
- Future Optima IT solutions
- * Pursuing a comprehensive Data Science course with a focus on Artificial Intelligence, covering core topics like data wrangling, machine learning algorithms, statistical modeling, and deep learning.
- * Gaining hands-on experience in AI-driven data analysis through practical projects, including model development, optimization, and evaluation techniques, while also enhancing skills in data visualization using Power BI and Tableau to effectively present insights.
- * Learning advanced machine learning and AI concepts, such as neural networks, NLP, and computer vision, to apply in various real-world data science scenarios.
- Education
- Bachelor of computer application

PROJECTS

CROP RECOMMENDATION EDA - Personal Project

- Conducted exploratory data analysis to recommend optimal crops based on environmental and soil conditions.
- Handled missing values, treated outliers, and applied encoding techniques for ML compatibility.
- Visualized data trends using Matplotlib and Seaborn.

Emotion Detection (OpenCV & Deep Learning)

- Developed a real-time emotion detection system using OpenCV, CNNs (TensorFlow/Keras), and FER2013 dataset.
- Implemented Haar cascade for face detection and deployed a live webcam-based classification model.
- Achieved high accuracy through hyperparameter tuning.
