UNIVERSITY PROJECT

"A Cross-sectional and Temporal analysis on the Prevalence, Pattern and Perception of Substance Abuse among Youth in Ernakulam District"

2023-2024

- The primary objective of the study was to make a cross-sectional and temporal analysis on the Prevalence, Pattern, and Perception of College students in the Ernakulam District of Kerala on drug abuse while comparing the past two year's data (i.e. 2022 and 2023) with the current year's data (i.e. 2024) with the help of a few hypotheses for meeting these objectives.
- For this study, we had created three scale variables: Risk Perception of Students toward Substance Abuse, Disapproval Rate Score, and Perception of Drug Accessibility. We used these variables to compare the opinions of Higher Secondary and Higher Education Students over the years of 2022, 2023, and 2024.
