Objective

To secure a content writing job where I can utilize my good writing skills, creativity, and passion for storytelling to develop compelling content and advance professionally in an energetic marketing team.

Education

SAFI Institute of Advanced Study Bsc computer science	2022-2025
Zamorins Higher Secondary School Bio Science	2021-2022
Bem higher secondary school High school	2014-2020

Experience

IIT Palakkad Intern	14/10/2024 - 18/10/2024
This experience allowed me to deepen my technical knowledge, improve my problem-solving abilities, and develop a strong foundation in programming and machine learning concepts. Participated in a 5-day intensive bootcamp focused on programming and machine learning fundamentals. Gained hands-on experience in coding, data analysis, and implementing machine learning algorithms. Worked on real-world projects and problem-solving tasks to enhance technical skills. Collaborated with peers and mentors to understand the practical applications of machine learning in various domains. Acquired foundational knowledge of programming languages and ML frameworks.	

Skills

Python	Java	JavaScript	C++	HTML	Communication skills	Writting skills
Adaptability	Time management	Creativity	Copywriting and editing	Social media content		

Project

Trackify This project aims to develop a comprehensive bus tracing system is designed to enhance students transportation efficiency. By utilising GPS technology and real-time data analytics, the system will allow users to track bus locations, estimate arrival times, and receive alerts about delays. The project will involve creating a user-friendly mobile application and a backend server to process and manage location data.
