Tools and Technology :-

- HP Application Life Cycle Management 11.0 (Quality Center Edition) -> For BPT - Requirements, Release, Testing and Defect (As a Process contact, job access and field data configuretor)
- CA Global Service Desk Manger v R12 -> For IT - Service, Change, Incident, Problem & Configuration (As a Process contact, job access and field data configuretor)
- IBM Cognos 7, QlikView, EZSQL -> For Data Query Builders and Analyzers- Data mapping, Integrated KDD Reporting
- Microsoft Office -> For ₹ OMS – Calendar activity planner, User access, Inventory, GL entry posting and TB, Reporting)

HCL Technologies, India

Domain and Client :- Casino lottery Gaming (WMS Gaming, USA)

Roles and Responsibility :- Technical Team Member (Dec 2006 – Aug 2010)

- Enabled testing delivery environment for Bluebird cabinet with CPU NXT processor and devices, network gaming, remote configuration and download.
- Completed compatibility, conformance, regulatory / GCB compliance testing with player permit, tracking and pay limits, different kiosk's hardware devices upgrade, software features / patch releases for single, multi and progressive players standalone / class 3 online gaming.
- Configured and tested Slot Accounting Protocol using IGT SAS simulator under various forms of cash in / out scenarios affecting the slot machine meter, evidence reporting and event logs.
- Performed defect logging, tracking, root cause analysis and handled data center query responses. Involved in setting up and testing EGM with variety of peripheral devices like display screen sizes, touch screen and button panel inputs, currency cash and coin acceptor / dispenser / hopper, printer / scanner for receipt, coupon and voucher ticket with barcode, NXT series mother boards, loading SD cards with different OS and gaming versions, TPM firmware rules data to HSM EPROM micro controller chip of mother board with master data / base value settings.
- Verified EGM mounting and power recycle resilience, call attendant checks / beacons.
- Tracked and monitored fixed asset inventory with specifications. Practiced tailored agile iteration model. Offshore to onsite U.S.A delivery.

Tools and Technology :-

- HP Test Director
- Serena Team Track
- IGT SAS Simulator
- Electronic Gaming Machines

Domain and Client :- Identity and Access Control Solutions (EMC RSA Security, INDIA)

Roles and Responsibility :- Technical Team Member

- Assured and Inspected product release under different platforms for dc promo.
- Completed User interfaces, client server installation / configuration setup, integration conformance testing for single sign on, adaptive authentication for apps port lets that are deployed in the same / different web / apps portal servers that are connected to a directory server.
- Involved in a coordinated effort in setting up of SSL KEY infrastructure test environments.
- Monitored and conducted system or products log analysis as a part of audit and incident reporting.
- Optimized resource and reduced cost by adapting virtualization products in the lab infrastructure.
- Scheduled and performed preventive maintenance and R&E monitoring. Performed application, storage capacity and contingency planning for the lab environment.
- Participated in periodic DCS re-certifications (ISO series), tested UABH configurations, SCM, placing and revocation of crypto .cer, cipher suite, master / base schema setup, DBC DSA with SQL DAS driver, wmic htree / node to DNS database hookup commit / rollback and replication, IP load balancing / proxy layer fall back, data quality and masking (DAP), NTLM / net logon AAAA user profile principals and permissions, objects with particulars, profile access policy entitlements provided for different object attributes. Plotting properties file for entity domain managed zone.
- Added improved leveled check points for monitoring, real-time handshake protection by IP v4 / IP v6 central audit logging of distributed system from located time zones for various purposes by people challenged with

allowed reference DB and secure-id device UID OTP / GUI session token there by producing net outcome of increased service availability and performance in terms of event response, recovery time.

Tools and Technology :-

- RSA Access Manager and Clear Trust
- Apache, IIS, Jboss, Weblogic (HTTP Admin and Monitoring)
- Windows NT (MMC 3.0), Linux (REDHAT)
- VMware (M/C OS platform clustering, hibernated image, VMX operations -(backup & restore, VDI rec / ply)

Polaris Software, India

Domain and Client :- Automation Testing (DTCC - Depository Trade Clearing Cooperation, USA)

Roles and Responsibility :- Associate Consultant (Feb 2006 – Dec 2006)

- Identified, captured functional and data driven test scenario and cases.
- Developed test automation scripts for the web interfaces and functionality, Implemented test process management for the offshore projects.
- Created keywords driven test data sets for various possible test points for manual and automated scripts.
- Triggering initialization auto run scripts / process chain as per the task schedulers and debugged scripts / object failures.
- Timely report generation of applications job test / AUT run with results. Defect logging.
- Performed service comply testing with FIPS node for single sign on, cross site domains, verified transaction posting status and data confirmation using tokenized XML schema bundles request and responses codes under simulated environment.
- Performed indexing and verified daily latest / roll-out build check in, check out, file dispatchers / transfers. Conducted planning, effort estimation, Defect / Query review on the delivery modules using program walk troughs and change scanners.
- For clients, reduced major application regression / sanity cyclic time to test with early defect findings, increased testing coverage, cutting out per person additional working hours on projects / daily patrols. Improved success rate of application releases and quality of test results. Practiced TMM. Offshore to onsite U.S.A delivery.

Tools and Technology :-

- HP Test Director
- Winrunner 8.0
- Microsoft Visual Source Safe

Nuva Systems, India

Domain and Client :- Textile / Garments Web based Migration (Premier Mills, INDIA)

Roles and Responsibility :- Team Member (March 2005 – Jan 2006)

- Translated use cases / scenarios to ER / UML data modeling diagrams, algorithms for SRS, conducted feasibility study using prototypes, Developed B2B 3 tier MVC web portals for merchant registry and purchase order form under sales modules.

- Reviewed and set-upped RAD workbench with accelerated builders and easy configurable components for the development and deployment which reduced cost per implementation cycle and time. Performed program compilation and deployments in server, data base schema upgrades, data migration and loading.
- Involved in back office operational services for data merging, linking, retrievals, reversals for double entry errors, archiving, backup restoration and performance tuning.
- Created trace ability matrices for the product modules release variants and updated standard operational manuals.
- Conducted post implementation review, routine health checks and maintenance exercise for the production and disaster recovery sites.
- Attained complete paper less form submission and record keeping, increased process clarity and reduced complexity, time of dealing with global merchant traders.
- Practiced SDLC with waterfall and V model.

Tools and Technology :-

- Eclipse with Myeclipse Luna RAD Workbench (For UML, Code Integration, Configuration, Packaging and Deployment with Error Analyzer)
- Bugzilla 2.X, Team Track, Microsoft Visual Source Safe
- Apache, IIS, Jboss (HTTP Admin and Monitoring)
- Windows Operating System

Integer Software Solutions, India

Domain and Client :- Travel Solution - Business Process Automation

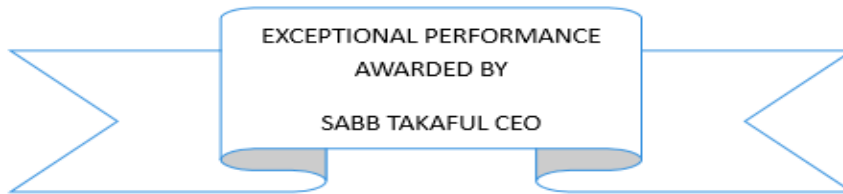

Roles and Responsibility :- Software Engineer (April 2004 – Feb 2005)

- Captured SRS with functional and non-functional requirements.
- Developed web based B2B front end for passenger using self-service web forms for travel booking and approval routing for passenger travel clearance, configured and tested access directory server parameters for active login pages with applications home / index pages for 2 factor form based authentication.
- Deployed .war and .ear packages to application server.
- Performed hardware assembling, trouble shooting for workstation machines, OS with and without dual booting, memory partitioning, BIOS and anti-virus installation / updating, PNP n/w card slotting, nic adapter / driver netting (DHCP / Static), user work space setting.
- Tracked annual maintenance contracts, license agreements for infrastructure hardware and software.
- Data provider for monthly service operational performance based on the engineering effort time sheets and number of use cases successfully signed off as completed from the provided work order.
- Leveraged cost benefit for development and integration by selecting open-source software development kit.
- Success full as a trainer in emerging software technologies.

Tools and Technology :-

- Eclipse with Myeclipse Luna RAD Workbench (For UML, Code Integration, Configuration, Packaging and Deployment with Error Analyzer)
- HTML, JSP, JAVA Standards Development Kit
- Apache, IIS (HTTP Admin and Monitoring)
- Windows Office Package
