PERSONAL PROJECTS

TimeZone Ecommerce Website

- Developed using Golang RESTful API on top of Gin framework.
- Used GORM library with PostgreSQL Database.
- Applied JWT which is a GO implementation of JSON Web Tokens.
- Dependency injection using Wire for automating connecting components.
- Integrated Swagger documentation of Go annotations.

Restaurant Management Website

- Built on GO using Gorilla Mux framework to design API endpoints.
- Integrated NoSQL database using MongoDB along with necessary CRUD operations.
- Added robust error handling mechanisms to gracefully handle unexpected failures.

Personal-Website

- Used HTML to create the website's content and structure.
- Added styling using the CSS framework.
- JavaScript has been used to make the page interactive.
