OBJECTIVE

Full Stack Developer with over 2 years of experience in designing and deploying scalable web applications. Proficient in React.js, Next.js, Java, and Spring Boot, with a strong background in backend system design, API development, and cloud integration. Experienced in delivering robust solutions under tight deadlines, integrating security protocols, and mentoring junior developers.

TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Material-UI, Tailwind CSS, Bootstrap
Backend	Java, Spring Boot, RESTful APIs
Databases	MySQL
DevOps	CI/CD
Version Control	Git, SVN
Security	OAuth2, JWT, MFA
Other	Agile Methodology, Microservices Architecture, Software Design Patterns

PROFESSIONAL EXPERIENCE

Software Engineer

August 2022 - Present

Ospyn Technologies Pvt. Ltd., Kerala, India

- Developed and deployed full-stack web applications utilizing **React.js**, **Next.js**, and **Spring Boot**, enhancing application performance and user experience.
- Implemented a **Multifactor Authentication (MFA)** system integrated with a custom Notification Management System (NMS) for secure OTP delivery via multiple channels (email, SMS), ensuring enhanced security measures.
- Designed a dynamic tooltip feature with role-based permission control, enabling selective access for users based on their roles, thereby improving user experience.
- Led the development of responsive admin dashboards and customer portals using **Material-UI (MUI)**, focusing on seamless interaction and visual appeal.
- Delivered multiple projects on tight deadlines, optimizing performance, minimizing load times, and improving backend efficiency through best practices in software development.

Key Achievements:

- Launched a secure customer portal for handling sensitive operations, ensuring a robust authentication mechanism and optimized data flow between client and server.
- Improved job application workflows by developing a streamlined recruitment module, automating applicant notifications and simplifying the HR process.
- Developed a corporate website showcasing the company's products and services, enhancing online presence and customer engagement.
- Provided mentorship to team members on best practices in **React**, **Spring Boot**, and **Git**, fostering a collaborative learning environment.

PROFESSIONAL PROJECTS

- **Full-Stack University Web Portal Development**

Contributed to the development of key modules for a university web portal, employing a full-stack approach that utilized **React.js** for the frontend and **Spring Boot** for the backend. This project improved student access to academic resources, featuring user authentication, responsive design, and a RESTful API for seamless data communication between the client and server.

- **Internal Operations Management Application**

Developed a robust internal software application for operational management using **React.js** for the frontend and **Spring Boot** for the backend. This application streamlined processes by providing real-time data insights and analytics, enhancing decision-making and improving overall operational efficiency.

- **Customer Portal Development for International Trade**

Created a customer portal utilizing **Next.js** for server-side rendering and improved SEO, paired with **Spring Boot** as the backend service. The portal facilitated international trade operations by providing features such as document uploads, transaction tracking, and a secure messaging system, ensuring efficient communication and transparency for users.

- **Corporate Website Development**

Built a professional website showcasing services and products using **React.js** and integrated a **RESTful API** for dynamic content delivery. The website featured responsive design principles and accessibility standards, significantly enhancing user experience and company visibility across digital platforms.

- **Infrastructure Management Application**

Developed an application for managing operations related to infrastructure investments. This project leverages a full-stack architecture with **Spring Boot** for backend services and **React.js** for a user-friendly frontend interface, focusing on data management, reporting functionalities, and user access control to improve operational transparency and efficiency.

PERSONAL PROJECTS

Weather Dashboard

- Developed a responsive web application using React.js and the OpenWeather API to display current weather conditions, a 7-day forecast, and historical weather data for any location.

Portfolio Website

- Created a personal portfolio website using Next.js and Tailwind CSS, featuring projects, blogs, and interactive elements. Integrated contact forms using Node.js and Nodemailer for backend support.

EDUCATION

Bachelor of Technology (B.Tech) - Computer Science & Engineering

June 2018 - June 2022

APJ Abdul Kalam Technological University, Kerala, India

Relevant Coursework: Data Structures, Algorithms, Object-Oriented Programming, Web Development

LEADERSHIP & MENTORSHIP

- Provided continuous technical mentorship to junior developers, focusing on React.js, Spring Boot, and version control tools, leading to improved team productivity and knowledge sharing.
- Conducted internal training sessions on front-end development best practices, security protocols, and Agile methodologies.

ADDITIONAL INFORMATION

Languages: English (Fluent), Malayalam (Native), Hindi (Intermediate)

Interests: Open-source development, cloud automation, AI-powered web apps
