SUMMARY

"I am a passionate and creative individual with a strong interest in video editing and graphic designing. As a fresher, I have hands-on experience using tools like Adobe Premiere Pro, After Effects, Photoshop, and Illustrator to create engaging visuals and videos. I'm eager to learn, grow, and contribute to creative projects that combine storytelling with design."

and I enjoy creating content that is both visually appealing and impactful.

I've worked on small-scale projects like social media graphics, short video edits, and logo designs, which have helped me develop a creative eye and improve my technical skills. I am constantly seeking new opportunities to learn, collaborate, and grow as a visual content creator.
