As a motivated engineer, I am enthusiastic about exploring diverse areas of knowledge and developing valuable skills. I am adaptable, a quick learner, and thrive on challenges. With a passion for continuous growth and a commitment to excellence, I am excited to embark on a career path where I can contribute my skills and contribute to the success of any team or organization I join.

Education

Government Engineering College Idukki <i>Bachelor of Technology in Computer Science and Engineering(CGPA: 7.99)</i>	2020-2024
Higher Secondary <i>St.Augustine's GHSS (Percentage:96.58)</i>	2017-2019
SSLC <i>St.Augustine's GHSS (Percentage:100)</i>	2017

Experience

Software Developer Intern

- Developed and enhanced web components using Reactjs, focusing on user interface design and functionality.
- Collaborated with team members to understand project requirements and implement features.
- Applied knowledge of React hooks and state management to build efficient, reusable components.

Projects

EaseLex | *React.js, Html, CSS, FastAPI*

- BTech final year project.
- A website which is developed for detecting dyslexia using gamified online tests. It also provides support and assistance to dyslexic people. There are other features like STT, TTS, and Audiobook.
- Front-end is done using React, CSS and Html and FastAPI is used for deploying the machine learning model.

AttendEase | *OpenCV-Python, Html, CSS*

- BTech mini-project
- An automatic attendance monitoring system that uses face recognition technology. It is a computer-based system that automatically identifies and verifies a person's identity based on their facial features.
- The system automates the attendance marking and periodically generates attendance reports that will be mailed to the respective faculties. Implemented using OpenCV-python.

Bus Reservation System | *MySQL, Java, Netbeans*

- Designed to facilitate the process of booking bus tickets, managing schedules, and handling passenger data efficiently.
- This project facilitates efficient bus ticket booking and management through a well-structured database system and user-friendly interfaces.

Currency Converter | *Html, CSS, Javascript*

- A tool which enables users to convert amounts between different currencies using real-time exchange rates.
- This tool is practical for quick currency conversions and helps users easily understand currency values across different denominations.

Technical Skills

Languages: C, Java, Python, Html, CSS, MySQL,React js

Technical Tools: VS Code, Github, Overleaf Latex

Concepts: Compiler, Operating System, OOPs, Data structure.

Achievements

NPTEL Online Certification (Programming in Java)

Kaggle Certification on completing Python and machine learning course

Participated in All Kerala Women Hackathon
