EDUCATION

Rajagiri School of Engineering <i>Masters of Technology in Computer Science and Engineering</i> CGPA : 7.6/10.0	Kakkanad, Kerala Aug 2025 – Jul 2027
Saintgits College Of Engineering <i>Bachelor of Technology in Computer Science and Engineering</i> CGPA : 6.9/10.0	Pathamuttom, Kerala Nov 2021 – Jul 2025
Marian Senior Secondary School <i>Higher Secondary - Biology Science</i>	Kottayam, Kerala Jul 2019 – Jul 2021
Marian Senior Secondary School <i>10th grade</i>	Kottayam, Kerala March 2018 – March 2019

INTERNSHIPS

ICT academy of Kerala <i>Initiative of Government of India</i> Completed structured training in digital skills and basic web development.	May 2022
Archis Academy <i>Training on Web Development Basics</i> - Gained proficiency in web development fundamentals, with hands-on experience in HTML, CSS, and JavaScript. - Developed multiple small-scale web projects to demonstrate practical skills in web development.	August 2023

TECHNICAL SKILLS

- Programming Languages:** Python, C
- Web Development:** HTML, CSS, React
- Developer Tools:** VS Code, Git
- Database Management:** MySQL, PostgreSQL

PROJECTS

Cyclone-Aware Safe Route Planning for Fishing Boats - Building a cyclone-aware route planning system integrating geospatial data analysis and risk assessment logic. - Analyzing cyclone trajectory data to determine safe navigation paths. - Implementing interactive visualizations using Folium to dynamically map high-risk and safe zones. - Designing a decision-support mechanism to enhance maritime safety during extreme weather events. - Technology used: Python, Folium, Geospatial APIs	Ongoing
Movie Recommendation System - Built a content-based recommendation system using TF-IDF vectorization and cosine similarity to analyze textual movie data. - Performed text preprocessing and feature extraction to enhance recommendation accuracy. - Designed and deployed an interactive Streamlit application for real-time personalized recommendations. - Technology used: Python, NLP (TF-IDF), Streamlit.	October 2025

Hospital Token Management System (HTMS)

May 2024

- Developed an innovative solution to address inefficiencies in hospital appointment booking processes.
- Designed to streamline appointment scheduling and enhance patient experience, the HTMS provides real-time updates on token status, empowering patients to manage appointments efficiently and reducing wait times.
- Technology used: React.js, CSS, Firestore, Firebase.

RAKSHA - Disaster Relief and Rescue System

April 2025

- Developing a decentralized IoT-based communication system to improve disaster rescue operations.
- Integrating wearable devices and a mobile app for real-time tracking, automated alerts, and resource management.
- Technology used: sensors, ESP32, React Native.

ACTIVITIES

Member of TINKER HUB at Saintgits College of Engineering

- Voluntarily coordinated Tink-Her-Hackathon 1.0 and managed participants from 15+ top colleges in Kerala, 35 teams, and over 120 participants.

Volunteered in College Fest

- Participated in organizing and conducting National level competition SRISHTI at Saintgits College of Engineering in Compering Committee (2022) and Technical and Evaluation Committee (2023)

NPTEL Course

- Completed NPTEL Course on Database Management System

ACHIEVEMENTS

- **APJAKTU CERD:** Financial Assistance for Student Projects (2024–25)
