SKILLS

- Figma
- Python and Django
- Adobe Photoshop and Adobe Illustrator
- HTML5, CSS
- Flutter
- Javascript
- Information Architecture
- Trend Research and Content Ideation
- Design Thinking
- Copywriting
- Visual Design and Layout
- Time Management and Multi-tasking
- Communication
- Leadership
- Quick Learner

PROJECTS, INTERNSHIPS AND CERTIFICATIONS

Angel Collections-Responsive Website - Designed a responsive personalised UI/UX concept for a Artificial, fancy shop website focused on elegance and user friendly navigation. Conducted User research to understand purchasing behaviour and refined the design based in the insights. Created wireframes showcasing product displays and smooth browsing flows. Implemented a clean style to reflect the sophistication. Ensured accessibility, responsiveness and seamless interaction across devices. Delivered a user-centered design that enhances browsing, product discovery and overall shopping experiences. Used premium color palettes,elegant typography and clean UI patterns.

D+Home-Medical Consultation App Case Study - Designed a comprehensive healthcare app using core principles such as clarity, accessibility, consistency and user-centred design. The app enables users to book online and offline doctor appointments,order medicines,schedule lab tests and scan,and request ambulance services. Conducted user researches to identify patient needs,their pain points and created intuitive information architecture and smooth user flows.Delivered a responsive,accessible healthcare experience that reduces user effort and enhances service reliability

Industrial Training In Python-Completed Industrial training in python at Nexus Technologies,Calicut and worked on various real-world projects that enhanced understanding of Python Fundamentals,object oriented Programming and it also enhanced the ability to adapt to technologies efficiently.

Flutter App Development- Project that involved designing and developing fully functional cross- platform mobile application. Project focused on creating the user interface, integrating APIs and managing data and ensuring smooth app performance on both Android and ios platforms.

Gas leakage Detection system using Firebase cloud and Flutter Application(ios based)- This group project combines the power of IoT technology, Firebased cloud services to create a comprehensive solution for monitoring and alerting users about gas leaks in real time.The system architechture integrates gas sensors with microcon-trollers which communicate with firebase cloud for data storage and analysis whereas flutter offers a frame work for building beautiful and responsive user interfaces.

Sentiment Analysis Using Machine Learning- This project involved data Pre-processing, feature extraction and implementing machine learning algorithms to accurate sentiment prediction. Therefore the project explained the working of sentiment analysis model, their real-world applications and customer feedback analysis and demonstrated the project outcomes with practical examples.

DECLARATION

I hereby declare that all the Information furnished above are true and correct to the best of my knowledge and beleif.
