Union Christian College, Aluva	Jan 2021 - Jan 2024

PROJECTS

Impact of shopping apps on consumer behaviour

- Conducted a comprehensive study analyzing the influence of shopping apps on consumer behavior, utilizing data from a diverse sample population.
- Revealed that 56% of respondents demonstrated a preference for online shopping apps over traditional shopping methods, highlighting a significant behavioral shift.
- Designed and implemented robust data collection and analysis methodologies to ensure accurate and actionable insights.
- Leveraged statistical tools and consumer behavior models to interpret data trends and support conclusions.
