Dedicated M.Sc Data Analytics graduate with strong expertise in machine learning, deep learning, and advanced analytics. Seeking a challenging role that leverages my analytical skills to support data-driven decision-making and innovation across diverse industries. Eager to apply my academic background and practical experience to develop creative, impactful solutions.

Education

Digital University Kerala

Master of Science in Data Analytics with specialization in Bio AI

Thiruvananthapuram, Kerala

2023 – 2025

Yenepoya University

Bachelor of Science in Forensic Science, Cyber Security and Data Analytics With IBM

Mangalore, Karnataka

2020 – 2023

Vidyodaya School

Science (Biology)

Ernakulam, Kerala

2019 – 2020

Experience

Forensic Science Intern

District Police Office, Ernakulam Rural, Aluva

15/02/2023 – 02/03/2023

- Learned about forensic science principles and the steps involved in crime investigation.

Data Analyst Intern

DataguardNXT, Kochi, Kerala

05/02/2024 – 19/02/2024

- Gained hands-on experience in data analysis, deriving actionable insights from real-world datasets.
- Worked with data visualization tools to create interactive dashboards and reports for better decision-making.

AI Intern

BEO Software Private Limited, Palarivattom, Kerala

27/01/2025 – 02/05/2025

- Gained hands-on experience in machine learning, deep learning, data analysis, and AI model development.

Projects

Custom NER for Climate Change Documents | *Natural Language Processing*

- Developed a custom Named Entity Recognition (NER) model using SpaCy to extract climate change-related entities from documents and articles. Annotated data with various climate change/natural calamity entities and deployed the model on Streamlit for real-time NER extraction from user input.

Low Light Object Detection System Using TinyML

- Developed a low-light object detection system using YOLOv12n and OpenVINO for real-time thermal image inference on edge devices.

Heart attack Prediction using Machine Learning | *Domain - Healthcare Analytics*

- Developed predictive models for heart attack risk assessment using Kaggle's heart health dataset. Implemented Decision Tree, Random Forest, SVM, XGBoost, and ANN (TensorFlow's Keras API). The ANN model achieved the best performance, demonstrating its potential in enhancing early detection and personalized treatment in healthcare analytics.

Certifications

Advanced Certification in Cyber Security

IBM

Google Cloud Career Launchpad Generative AI Track

Google Cloud

Google Cloud Career Launchpad Data Analyst Track

Google Cloud

Technical Skills

Programming Language: Python

Libraries: Pandas, NumPy

Developer Tool: Microsoft Power BI

Machine Learning

Deep Learning

Natural Language Processing(NLP)

Office Tools: Microsoft Word, Excel

Soft Skills

Problem-solving abilities and statistical proficiency
Time Management
Communication Skill
Adaptability to Environment
Project Management and Coordination

Languages

English, Tamil, Kannada, Hindi, Malayalam-Native
