

Jeffry M Joshua

+91 - 7090474861 | Bengaluru, IN | jeffryjoshua15@gmail.com

MCA graduate with hands-on experience in software development and software testing. Proven ability to collaborate and thrive in a team environment with ease. Worked as a computer science educator and currently looking for opportunities to leverage and hone my skills with new challenges and contribute to meaningful projects for their success.

Skills

- **Languages & Databases:** Python, SQL, Java, C, C++, JavaScript
- **Frameworks & Tools:** FastAPI, Flask, Next.js, Tableau, HTML/CSS, Git, Selenium, Postman, Gatling, PowerBI, NLP, PyTorch, Pandas, NumPy, Node.js

Work Experience

Computer Science Teacher

Aug 2025 - Apr 2026

CMR National PU College

Bengaluru, IN

- Delivered Computer Science curriculum for Grade 11 and 12 students in accordance with Karnataka PU Board.
- Incorporated hand-on learning in Python and SQL and other web technologies.

Software Testing Internship

Mar 2025 — June 2025

CodTech IT Solutions

Remote

- Designed and executed manual test cases for web applications.
- Perfomed API testing, validating request/response cycles.
- Conducted performance testing, designing load scenarios and analyzing response time metrics.
- Assessed web application vulnerabilities including XSS and SQL Injection in controlled environment.

Education

Program	Institution/Board	Year
MCA	Kristu Jayanti College, Bengaluru	2023 — 2025
BCA	Kristu Jayanti College, Bengaluru	2020 — 2023

Projects

Cyber Café Management System

VB.NET and SQL

- Architected and developed a desktop-based management system delivering automated billing and session tracking to eliminate manual record keeping.
- Engineered a relational database schema with interconnected tables to ensure accurate and real time data retrieval.

Online Shopping Management

ASP.NET and SQL

- Designed and implemented a dynamic web interface enabling seamless user interactions for product search, order placement, and purchase history tracking.
- Developed a structured relational database to support efficient query performance.

Chatbot

Python, NLTK, JSON

- Developed a rule-based conversational chatbot using NLTK implementing a bag of words model to preprocess and vectorize user inputs for intent classification.
- Engineered an intent recognition pipeline involving tokenization and lemmatization to accurately map user queries to predefined response categories,

Music Genre Classifier

Python, Librosa, Scikit-learn, MFCC, Pandas, NumPy

- Developed a robust classification using multiple models to identify the best performing algorithm.
- Processed and structured audio feature data to ensure reliable and unbiased model evaluation.

House Price Prediction System

Python, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn

- Curated a custom dataset of Bengaluru housing listing, manually collecting and structuring real world property data.
- Trained and benchmarked multiple regression models to determine the most accurate price prediction algorithm.
- Visualized feature distribution, correlation, and model performance deriving actionable insights into key drivers of housing prices in Bengaluru,

Formula 1 telemetry data

[Link](#)

Python, FastF1, Pandas, Matplotlib, Seaborn

- Developed a personal project leveraging the FastF1 package to extract and process real world telemetry.
- Processed multi-layered visualizations to communicate complex telemetry patterns in understandable format.

Formula 1 Tyre Strategy Simulator

[Link](#)

Node.js, Express, Axios, JavaScript, HTML/CSS, Jolpica F1 API

- Architected and developed a full stack website as a personal project that simulates optimal Formula 1 tyre strategies for any driver, track and session.
- Engineered a RESTful backend with seven dedicated API endpoints to fetch real-time driver profiles, circuit data and historical race winners.

Leadership & Publications

- “Cybernetic companion using Machine Learning implemented through python”, presented and published at “International Conference in Computational Intelligence – 2023”
- “Assessing Security Risk of Password Storage in Chromium-Based Browsers”, presented at “International Conference in Computational Intelligence – 2025”
- Organized events are various intercollegiate fests.
- Coordinated workshops and training sessions.
