www.linkedin.com/in/nandhana-das

PROFILE

Electronics and Communication Engineering undergraduate with strong interest in embedded systems, IoT, machine learning, and robotics. Passionate about applying engineering concepts to real-world challenges through projects and research.

EDUCATION

B.Tech in Electronics and Communication Engineering

APJ Abdul Kalam Technological University, VISAT Engineering College 2022 – 2026

Higher Secondary (12th) VBSN HSS Njeezhloor 2020 – 2022

SSLC (10th) Bappuji Central School Peruva (CBSE) 2020

SKILLS

- Python, C, MATLAB, IoT, AI/ML, Circuit Designing, Communication, Time Management, Adaptability

PROJECTS

IoT-Enabled Wearable Health Monitoring System for Miners

- Developed IoT wearable health monitoring system using ESP32-S3 with SpO₂, ECG, temperature, and IMU sensors.
- Implemented I²C and SPI communication and low-power power management (TPS62740, TP4056).
- Enabled LoRa (SX1276) long-range communication with real-time monitoring, anomaly and fall detection.

MED-BOT: AI-Based Medical Assistant

- Developed an AI-based MedBot using Raspberry Pi for real-time health monitoring.
- Implemented emergency alerts, medical guidance, and user interaction features.
- Built a compact, cost-effective system for remote patient care and safety.

INTERNSHIP EXPERIENCE

Keltron Knowledge Center, Trivandrum May 2023

- Gained exposure to IoT systems and PCB design through training sessions and workshops.
- Designed and simulated electronic circuits using software tools, developing understanding of embedded systems.

Keltron Knowledge Center, Kottayam June 2025

- Learned AI/ML fundamentals including supervised and unsupervised learning.
- Applied AI techniques to real-world problems.

CERTIFICATIONS & ACHIEVEMENTS

- Research Presentation – NCMST at IIST (2022)
- Research Presentation – ICIT at INTI International University (2023)
- Quantitative Research Simulation – JPMorgan Chase & Co. (2025)
- GenAI Data Analytics Simulation – Tata Group (2025)
- Certification in EV Design – CADD Centre (2024)
- Machine Learning – Google Crowdsourcing (2023)
- AI & Robotics Training – ZEBUS LLP (2023)
- Best Volunteer – IEEE 5NANO (2023, 2024)
- Best Volunteer – NASA Space Apps Challenge (2024)
