ABOUT ME

I am a graduate in Electronics and Communication Engineering, currently working as a **Sales Coordinator at GO EC Auto Tech**, a fast-growing EV charging infrastructure company. While my core title is Sales Coordinator, I play an active and ongoing role in **Customer Success operations**, ensuring a smooth and satisfying customer journey from deal closure to project execution. I act as the bridge between our 23-member sales team, project teams, CRM, and clients—ensuring clear communication, timely project updates, and alignment on deliverables and expectations.

My responsibilities go beyond sales support—I manage **project tracking, fund coordination, client communication**, and continuous customer follow-ups. I actively contribute to post-sale customer experience, ensuring that clients are informed, supported, and satisfied throughout the project lifecycle. I help remove friction points, coordinate internal teams for faster resolutions, and make sure that each customer engagement stays on track and delivers value.

Earlier, at **KeyValue Software Systems**, I onboarded over 120 clients in just three months, led pre-sales product demos, and achieved a 50% lead-to-customer conversion rate—while also cutting response time by 20%. My career started at **Sutherland Global Services**, where I provided IT help desk support for McAfee Antivirus users across multilingual regions, giving me a strong foundation in global customer support.

With a proven track record in **cross-functional coordination, client relationship management**, and a proactive approach to solving customer challenges, I'm excited to bring my energy, precision, and ownership mindset to a high-impact, global role.

EDUCATION

SECONDARY & HIGHER SECONDARY

Bhavans Vidya Mandir, Elamakkara / 2017 -2019
12th Grade – 70%
10th Grade – 9.8 CGPA

WORK EXPERIENCE

Sales Coordinator

GO EC Auto Tech, Vyttila | March 10, 2025 – Present

- Coordinate with a 23-member Sales team and the Project team to execute EV charging infrastructure rollouts.
- Work closely with the CRMS team for data validation, project tracking, and client account management.
- Manage communication and coordination of project timelines, fund collection, and customer updates.
- Ensure all departments receive real-time updates, promoting transparency and workflow alignment.
- Track project status and assist CRMS with updates on discount approvals and project cost verifications.
- Strengthen client engagement by providing proactive support and regular project progress feedback.

Customer Success Executive

Keyvalue Software Systems,

November 4, 2024 – March 14, 2025

Key Responsibilities:

- Delivered exceptional product knowledge support for CoFee, a fee-collecting application, ensuring clients understood and effectively used the product.
- Assisted customers with onboarding processes, including step-by-step guidance to ensure smooth implementation and adoption of the CoFee application.
- Participated in pre-sales activities, successfully pitching CoFee to potential leads and providing detailed product demos, highlighting key features and benefits.
- Acted as the main point of contact for customers, ensuring timely responses to inquiries and resolving technical issues in a professional and efficient manner.
- Followed up with customers regularly to ensure satisfaction, troubleshoot issues, and provide continuous product assistance.

- Collaborated with internal teams (technical support, product development) to escalate and resolve complex issues, ensuring minimal downtime for customers.

Key Achievements:

- Contributed to the onboarding and successful adoption of CoFee by over 120 new clients within the first 3 months.
- Improved customer satisfaction by resolving technical issues quickly and efficiently, reducing response times by 20%.
- Successfully demoed and pitched CoFee to a group of 70+ leads, converting 50% of them into active customers.
- Played a pivotal role in increasing product usage among clients by offering tailored support and additional product insights.
