PYTHON DEVELOPER

Junior Python Developer skilled in full-stack development with Python. Committed to delivering efficient, collaborative solutions for complex challenges. Passionate about continuous learning and adapting to emerging technologies. Actively seeking full-time developer roles to contribute to organizational growth and drive innovation.

TECHNICAL SKILLS

Programming Languages	Python, C
Frontend	HTML, CSS, Bootstrap
Backend	Django
Databases	MySQL
Version Control and IDEs	Git, GitHub, VS Code, PyCharm
API & Web Services	REST API (using Django REST Framework)

EXPERIENCE

Python Full Stack Developer Intern SMEC Labs	11/24-Present
- Employed Python, JavaScript, Django, HTML, CSS, and Bootstrap to create robust applications that provide smooth functionality and user-friendly experiences. - Improved data management and user interface features to boost application performance. - Proficient in handling application data with precision using MySQL databases. - Achieved success in collaborative development environments by utilizing Git for version control to maintain code quality and streamline project workflows.	

PROJECTS

Facial Recognition Using Attendance System DJANGO, MYSQL (Academic Project)

2024

- Developed a Student Attendance Management System utilizing facial recognition for accurate and efficient attendance tracking.
- Integrated facial recognition technology by implementing custom machine learning modules for face detection, training and recognition.
- Designed and implemented a multi-role authentication system to cater to students, teachers, principals, and administrators with role-specific functionalities.
- Created an intuitive web interface using Django, HTML, and CSS for seamless user interaction and navigation.
- Implemented dynamic complaint management modules for students, teachers, and principles to register and resolve complaints.
- Incorporated MySQL as the database backend for secure storage and efficient retrieval of user, attendance and complaint data.
- Optimized user experience by designing responsive pages and ensuring cross-role accessibility across devices.
- Automated session management to handle secure login/logout workflows and protect user data.

EDUCATION

Master of Computer Applications,Kerala Technological University

2022-2024

- Sree Narayana Gurukulam College of Engineering
- Computer Applications
