SUMMARY

Passionate frontend developer with 2 years of experience crafting engaging web applications. Skilled in modern web technologies and design, bringing ideas to life with seamless user experiences. Adept at solving complex challenges creatively.

EDUCATION

Prestige Institute of Management and Research	Indore, MP
Bachelor of Computer application	2021 – 2024

EXPERIENCE

Frontend Developer	2025 – Present
Xalt Analytics	Indore, MP
- Developed dynamic, performance-driven features for an AI-powered email generator using AngularJS. - Designed and built intuitive, responsive interfaces for a sports betting web app, implementing live odds tracking and optimized performance. - Led UI/UX development, collaborating with cross-functional teams to integrate frontend solutions with backend services for real-time data updates and secure transactions.	
Technical Intern	2023 – 2024
Xalt Analytics	Indore, MP
- Designed and developed interactive dashboards using Power BI and Looker, enabling data-driven insights and visualization. - Built and deployed the company's official website using Django, ensuring a seamless user experience with a robust backend. - Conducted extensive Exploratory Data Analysis (EDA) to extract meaningful insights and support business decision-making.	

PROJECTS

Magical AI Career NextJS
- Built an AI-powered career assistant web app using Next.js and Tailwind CSS, designed to help users generate tailored cover letters and portfolio-ready resumes. - Used Gemini AI for content generation, Clerk for authentication, and NeonDB with Prisma for database management. - Implemented modern UI components with Shadcn UI, ensuring a clean, responsive, and accessible user experience across devices.
Netflix Clone ReactJS, JSX, Tailwind CSS
- Built a responsive Netflix-like streaming platform using ReactJS and JSX, leveraging Tailwind CSS for modern and efficient styling. - Implemented a dynamic, interactive user interface with features like movie browsing, search, and categorization. - Integrated API-based movie data fetching for real-time content display.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript(ES6+), TypeScript, Python
Frameworks Tools: React JS, Angular JS, NextJS, Redux, Tailwind CSS, Bootstrap, Wordpress, MongoDB, NeonDB
Authentication & Backend Tools: Clerk

CERTIFICATION

- Machine Learning Certificate by NPTEL
- Enterprise Design Thinking Certificate by IBM
- Corporate Ambassador Intern Certificate by Ifortis Worldwide
