

Nazreen Fathima

SENIOR SOFTWARE ENGINEER

Aluva, kochi - 631017 | +91 9746797859 | nazreenfathima1308@gmail.com

Objective

Dynamic professional with 5+ years in fast-paced tech environments. Proficient in developing user interfaces with PHP, Angular, and experienced with SQL databases. Demonstrated ability to quickly master new technologies and deliver impactful software solutions. Seeking opportunities to leverage engineering skills for innovative projects.

Skills & Abilities

- PHP frameworks - Laravel, Magento
- SQL - MySql
- Frontend Frameworks - Angular 2
- Javascript, Typescript, JQuery
- HTML, CSS
- Version Control System - Git

Experience

Zerone Consulting | Senior Software Engineer L2

2022 – present

Frameworks used: Magento, Knockout, MySQL.

Real Estate Platform Application:

This platform simplifies the process of buying and selling property by offering tools and support for real estate developers, agents, and buyers. It streamlines property management, listing, and transactions, making it easier for users to access and manage real estate assets. Key features include property search and filtering, detailed property information, and real-time updates on offers and sales. The platform also integrates with third-party systems and mobile apps to enhance user engagement and accessibility across devices.

- Worked for a real estate platform that makes buying and selling property easier. It provides tools and support for developers, agents, and buyers.
- Architected solutions: utilizing modern web technologies, including PHP (Magento), Knockout.js, jQuery, to deliver responsive and user-friendly UIs.

- Collaborated with cross-functional teams to deliver agile projects, ensuring timely completion of milestones, thorough code reviews, and adherence to best practices.
- Mentored junior developers, providing guidance on best practices in software development, including performance optimization, debugging, and code structuring.

Quintet Solutions | Junior Software Engineer

2019 – 2022

Frameworks used: Laravel, Angular 2, Livewire, MySQL

Online Car Rental Website (Customer + Admin):

Developed a comprehensive car rental platform allowing customers to browse and choose luxury cars for rent with a minimum rental period of 2 days.

Implemented the backend system using Laravel for robust and scalable server-side functionality, including user management, booking processing, and payment integration.

Utilized jQuery for dynamic and interactive frontend features, enhancing user experience with real-time car availability updates, search functionality, and booking forms.

Web-Based Management System for Storage Systems:

This platform simplifies the process of buying and selling property by offering tools and support for This system is designed to manage and configure storage solutions, particularly focusing on Solid State Drives (SSD). The platform offers a comprehensive interface for administrators and IT professionals to efficiently manage storage resources, monitor system health, and track performance metrics in real-time.

- Developed and maintained key features for the web-based platform using Angular 4 and TypeScript, focusing on SSD storage configuration and management.
- Implemented real-time monitoring tools to track SSD health, including metrics such as disk wear, error rates, and temperature. Created and optimized user interfaces for managing storage resources, ensuring a responsive and intuitive user experience.
- Collaborated with backend teams to integrate frontend components with backend services, ensuring seamless data flow and real-time updates.

Education

SCMS SCHOOL OF ENGINEERING AND TECHNOLOGY

2018

Major: Btech in Electronics and communication
