I'm a seasoned Sales Engineer with nearly 5 years of experience in enhancing customer experiences and developing client-centric sales strategies for small to mid-sized enterprises. My expertise lies in precisely understanding client requirements, technology, and verticals to craft compelling solution & pitches and ensure accurate responses to RFI and RFP questionnaires. I excel in cold sales and writing technical proposals and translating complex technical information for diverse audiences. With a strong foundation in strategic sales planning and ROI analysis, coupled with effective communication, networking, and negotiation skills, I am well-prepared to make a significant contribution to your organization.

Work Experience

Sales Engineer – Calibraint Technologies

(Dec'23- Present)

I led sales initiatives in the UK, EU, & NA regions, boosting customer engagement by 15% through strategic outreach, client interactions, and tailored analyses. I work on the customized presentations, business proposals, RFI and RFP management, securing new business. Collaboration with product teams improved integration timelines by 20%, and I enhanced client communication by distilling complex technical information into clear content, raising sales by 10%. Utilizing tools like Google Workspace, Draw.io, and Figma, I crafted customized presentations, increasing successful proposal outcomes by 25%. Acquired new business of \$100K in the first quarter, and \$55k in Pipeline.

Channel Sales Manager–Bautomate

(Aug'23 - Dec'23)

I specialize in developing strategic alliances and driving revenue growth through channel sales. I actively maintain and enhance partner relationships through consistent communication and secure new business opportunities by negotiating key agreements such as NOCs, MOUs, and NDAs. My approach encompasses prospecting new partners, securing partnerships, overseeing deal closures, and managing the billing process. This holistic strategy ensures robust partner engagement and sustained revenue generation.

Presales Consultant – Vajro

(Jan'22 - Jan'23)

Accountable for engaging on Calls and chats with all prospective customers calling and acquire new business at app-first startups. End to End Sales including product demonstration, noting integration, implementation, and eventually closure. Build and increase knowledge on Vajro Identify the needs of the prospect, clarify relevant questions, and understand if there are immediate opportunities available for sales engagement Maintain accurate records of all activities in Excel.

Presales Consultant – ZOHO Corporations

(Oct'20- Dec'21)

I use to collaborate with tech, and sales teams to provide technical guidance during the sales process. I do cold outreach to prospects, I talk to clients, design customized presentations, conducted product demonstrations, and managed the technical aspects of the sales process. I also identified and addressed potential technical issues, and maintained strong relationships with clients. As a technical advisor to clients, I create various documentation such as workflow diagrams using draw.io, proposals, SOWs, SOPs, RFPs, POCs, RFQs, RFIs, Etc...

Presales & Platform Consultant– Infosys

(Aug'19- Jul'20)

My primary role is to support the sales teams by addressing key technical challenges and promoting Infosys platforms like Cobalt and Edge Verve. I take charge of specific sections of proposal documents, using my expertise to develop solutions. Additionally, I conduct product demonstrations and draft POCs, RFIs, and RFPs. I also handle end-to-end sales processes, from acquiring new business to engaging with C- and D-level executives to pitch our offerings.
