● PROJECTS

20/11/2023 – 15/03/2024
Smart Traffic control system using an Arduino Uno

This project combines Arduino Uno with AI-powered traffic management to optimize signal control and reduce congestion. Sensors and AI algorithms analyze real-time traffic patterns, adjusting light timings dynamically. AI-based image processing detects emergency vehicles, pedestrians, and violations, enhancing safety and automation. The system improves traffic flow, reduces waiting times, and minimizes fuel consumption, making roads more efficient and eco-friendly.
