PROFILE

Frontend and Full-Stack Developer specializing in MERN stack with experience in designing scalable, high-performance web applications. Proven expertise in React.js, Node.js, Express.js and MongoDB . Delivered measurable results by enhancing system performance by up to 30% and improving user engagement metrics by 40%. Adept at solving complex technical challenges and collaborating with cross-functional teams to drive impactful solutions.

Technical Skills

- **Front-End Development:** React.js, Redux, JavaScript (ES6+), HTML5, CSS3, Tailwind CS
- **Back-End Development:** Node.js, Express.js, MongoDB, SQL, RESTful API
- **Version Control & Tools:** Git, GitHub, Postman, Chrome DevTools, Redux DevTools

Professional Experience

Full-Stack Development Trainee

Luminar TechnoLab, Cochin | May 2024 – Nov 2024

- Engineered responsive web interfaces with React.js and Tailwind CSS, achieving a 15% decrease in page load times while enhancing mobile usability
- Architected and implemented state management solutions with Redux, reducing API call latency by 20% and enhancing data flow across components
- Designed RESTful APIs with Node.js and Express.js, increasing real-time user interactions by 30%
- Debugged and resolved 50+ critical production issues, improving overall system uptime by 25%
- Built reusable React components, accelerating development cycles by 30% across multiple projects.

Projects

Awesome Recipes (Full-Stack Application)

Technologies: React, Node.js, Express.js, MongoDB, Redux, Tailwind CSS

- Designed and deployed a recipe management platform featuring real-time search, user authentication, and admin controls, increasing user engagement by 40%
- Implemented global state management with Redux, improving data consistency and performance by 20%
- Built a RESTful backend using Express.js and MongoDB, achieving a 15% reduction in database query time
- Integrated AOS animations for interactive scrolling, increasing session duration by 30%
- Created a responsive UI, improving accessibility across multiple devices and platforms.

Media Player (Full-Stack Project)

- Built a media player with React.js, achieving 95% functionality coverage in testing.
- Integrated dynamic playlists and saved 90% of user preferences via local storage.
- Developed a Node.js, Express.js backend, handling metadata entries in MongoDB.
- Delivered a fully responsive, cross-platform design, improving user retention by 20%.
- Applied modular coding practices and used Git for version control.

Education

Bachelor of Computer Applications (BCA)

- Universal College of Arts & Science, Mannarkkad | June 2021 – March 2024
Relevant Coursework: Data Structures, Full-Stack Development, Advanced JavaScript, Database Management
- **Achievements:** Ranked in the top 3% of the class for academic performance.
