WORK EXPERIENCE

2021 - PRESENT

Codzoc Technolabs

As a software developer, I have been an integral part of the company, contributing to the development of innovative solutions and playing a key role in its growth and success.

- **My SugarClinic**

It is a React JS project designed to help individuals manage their diabetes effectively. It offers features such as tracking blood sugar levels, meal planning, and personalized recommendations, empowering users to take control of their health and make informed decisions.

- **Rehlati**

Rehlati is a tour package project built with Nuxt.js, designed to provide a user-friendly platform for travelers to explore and book various tour packages tailored to their preferences and destinations.

- **School Album**

A website built with Vue.js that displays a categorized album gallery of school events, featuring secure access for uploading images.

- **Delfy.ai**

A Next.js-based generative AI (OpenAI) newsletter-building platform designed for businesses to create personalized and engaging newsletters efficiently.

- **Rikroot**

A recruitment web application built with Vue.js, featuring an integrated platform for machine-based tests and automated candidate categorization based on their resumes.

- **Dish Discover (personal project)**

A recipe discovery platform built with React.js, where users can input a list of ingredients they have and instantly find recipes that match.
