PROFILE SUMMARY

I'm a dedicated React Js developer with 3 years of experience and have a solid grasp of Agile methodology. I am proficient in React.js and have good hands-on experience working with backend systems using Node.js, Express, and MongoDB and actively pursuing Google Cloud Platform (GCP) certification to enhance my cloud development skills further. I am genuinely enthusiastic about discussing my experiences and contributions further.

SKILLS

- Javascript
- ReactJs
- NodeJs
- Express Js
- Jest
- CSS
- HTML
- AWS

TOOLS AND IDES

- Git
- Jenkins
- JIRA
- FileZila
- Postman
- React Developer Tools
- MongoDB

EDUCATION

BACHELOR OF ENGINEERING

Bannari amman Institute of Technology - 2020
Mechanical Engineering

SOFTSKILLS

- Problem-solving skills
- Work independently
- Client Engagement
- Attention to detail
- Teamwork & Team Leadership
- Multilingual

WORK EXPERIENCE

Softnotions Technologies Pvt Ltd

Feb 2022- Present

Project: AI-Powered Data Exploration Platform

Tech Stack:

- Front-End: HTML, CSS, React, Bootstrap
- Data Visualization: D3.js, Chart.js
- Excel Integration: ExcelJS
- Cloud Platform: AWS
- Version Control: Git

Key Contributions:

- Engineered and developed a user-friendly, responsive web interface to allow users to upload and explore Excel data using machine learning.
- Implemented advanced natural language processing features that enabled over 500 users to interact with the application, generating insights delivered through graphs, tables, and charts for improved decision-making.
- Collaborated with back-end developers to implement data visualization features for interactive querying.
- Optimized the platform for cross-device usability across mobile, tablet, and desktop devices.

Project: MERN Care Management System

Tech Stack:

- Front-End: React.js
- Back-End: Node.js, Express.js
- Database: MongoDB
- Platform: SaaS-based Architecture
- Version Control: Git

Key Contributions:

- Played a pivotal role in the end-to-end development of a healthcare management system using MERN Stack (MongoDB, Express.js, React.js, Node.js).
- Designed and implemented RESTful APIs with Node.js and Express.js for secure and efficient backend operations.
- Developed and maintained MongoDB databases to ensure performance, data integrity, and scalability for data-intensive operations.
- Created and integrated seeders for common data like care home names, departments, and roles to streamline initialization and ensure data standardization.
- Delivered a robust SaaS solution for healthcare management, optimizing performance and scalability.
