Email id: anuragsurendran96@gmail.com

Phone no: 7092157409

Career Objective:

To effectively utilize my skills and knowledge in the field of engineering for the development of myself and for the company in which I am working with utmost dedication.

Technical Knowledge:

- *Programming in C, C++, C#, .Net framework, C# programming.*
- *Programming in HTML, CSS, CSS3, HTML5, Javascript*
- *Programming in Python, Java,R*
- *Database Management using SQL Queries.*
- *Implementing and executing the queries for databases in Microsoft SQL server management Studio 17.*

- *Developer tools - Microsoft Visual Studio framework 2019, CMS - Umbraco framework with latest version in C# . Net framework.*
- *Implementing, Deploying, development and testing the User Stories and User cases in the Azure Dev Ops (Dev Ops).*
- *Implementing and executing the queries for databases in Microsoft SQL server management Studio 17.*
-

Academic Qualification:

- *PG -Completed master's in M.E Master of Engineering in (Computer Science and Engineering), From Kings Engineering College with CGPA of 7.71 (2018-2020)*
- *UG in B.Tech (Information Technology)from Kings Engineering College with a CGPA of 6.3. (2014-2018)*
- *HSC from Alagappa Matriculation Higher Secondary school with 60%.(2014)*
- *SSLC from Asan Memorial Senior Secondary school with a CGPA of 8.6 (2012).*

Professional Work Experience:

Worked with SITEL India Pvt Lmt as Technical Support Engineer - L1 REMOTE Support Team, at Hardy Towers, Tidal Park - Chennai. For 7 months.

Worked with Xilligence (Arackal Digital Solutions) at Nila Technopark, as a Software Engineer (.NET/ SQL developer). as well as monitoring the WHD - Web Help Desk priority tickets Que handling and Management (Tech Support Analyst). (3years and 1month).

Projects Worked on :

1. *_Global Positioning System / Weather Traffic Sensitivity Index system (WTSI or WTS).*
2. *We used Front end: HTML, JSP, CSS, web application used was J2EE, IDE - Eclipse mars, and for the Back end we used - My SQL.*

3. Operating system used is Windows 7, JDK is 1.8, Server is Apache Tomcat 8.0, Script used is Java scripting done script and the Server-side script used is the Java Server Page.
4. Short Description of the Project: The aim is to solve a variety of emerging city problems such as the traffic congestion, energy consumption and pollution based on the data of the traffic flow, human mobility and geographical data etc. Many works have been done to investigate the impact of inclement weather to traffic. For example a heavy rain may slow down the traffic and cause congestions due to low visibility and high demand of vehicles , the increasing temperature in very cold days will freeze the roads and influence the transport , performance etc.
5. Advantage of the system is the investigation is done together for both weather as well as the traffic Key factor analysis is done. Both the weather as well as the traffic status can be known at the same time.

2. **TEES : An Efficient Search Scheme Over Encrypted Data on Mobile Cloud.**

1. We used Front end: HTML, JSP, CSS, Java script web application used was J2EE, IDE - NET BEANS, and for the Back end we used - My SQL.

2. Operating system used is Windows 7, JDK is 1.8, Server side Script used and the Server side script used is the Java Server Page.

3. Modules of the project is secure file uploading, splitting the encrypted file , splitting the encrypted file image split up using the BVCS algorithms and then validating, checking and the verification etc.

4. Advantages of the system are reducing the file search time and the retrieval time here, reducing the energy consumption, reducing the traffic flow overhead and over loading , control the statistics information leak , top - k relevant files searching algorithm etc.

Personality Traits:

- Leadership quality
- Team spirit

- Flexibility and Adaptability to work in any environment.
- Interested in updating knowledge through continuous learning.
- Good Communication and Presentation skills.

Achievements & Certifications:

- Attended workshop on EDC (Entrepreneurship development for fresher's on 22-03-2017 at KINGS ENGINEERING COLLEGE.
- NPTEL online course certification for MAD (Modern Application Development.)
- Attended Industrial visit programme at Digital Transmission centre, for Network monitoring and demo of optical fibre cable at BSNL on 15-07-2016.
- Attended a workshop/ training program on Big Data Analytics conducted by Centre for Development of advanced computing (C-DAC) From 7-10 August 2017.
- Participated and presented a paper entitled "Detecting and Analysing Urban Regions with High Impact of weather change and transport" in ICICET organized by Kings Engineering College held on 7-04-2018.
- Participated and presented a paper entitled " Efficient Scheduling Task Based On Cloud Computation Network Bandwidth" in ICICET-2019 organized by Kings Engineering College held on 18-09-2020
- Presented and Published a Research paper entitled as " Tees: An Efficient Search Scheme Over Encrypted Data on Mobile Cloud was reviewed by experts in research area and accepted by board of "AG Publications", which got published in International Journal Of Advanced Development in Science And Technology, (IJADST), ISSN: 2582-1059, Online, Volume : 2, Issued on 06-09-2020.
- Attended an online training programme for Python from 12-09-2020 to 27-09-2020, organized by MSME- Technology Development Centre, Guindy, Chennai(CFTI), and received a government certification for Python.

Hobbies:

- Reading books,
- Writing essays
- Listening to music.

Personal Details:

Gender : Male

Father's Name : Mr. P.Surendran

Nationality : Indian

Date of birth : 24-02-1996

Marital Status : Single

Languages known : English, Tamil, Malayalam.

Date:**KOLLAM.****(ANURAG SURENDRAN)**
