Professional Summary:

Software engineer with **4.8 years** of expertise in **.NET Core, ASP.NET MVC, and SQL Server**, specializing in designing and developing scalable web applications. Proficient in database design, query optimization, and API integration to enhance application performance. Committed to writing clean, efficient code and collaborating with cross-functional teams to deliver high-quality, secure, and maintainable software solutions. I am seeking a challenging role to enhance my learning and skills while contributing to the growth of the organization.

Skills:

Category	Skills
Technical Skills	ASP .Net MVC, Web API, ADO .Net, SQL, HTML, CSS, Javascript, jQuery.
Version Control	Git, GitHub.
Tools	Visual studio, SQL Server management studio, Azure DevOps, Postman, Checkmarx, Blackduck.

Experience:

Cognizant Technology solutions, Coimbatore.

DEC-2020 – Present

Project Name: OCR Services

Purpose: A set of services to extract the metadata from the user uploaded contractual documents based on specific synonyms and store the data back into DB tables for downstream application to consume and auto-populate in UI.

Tech Stack: .Net windows service, SQL, ADO .Net

Role: Jr. Software Engineer

Responsibilities:

- Worked on migration of file storage from **Oracle Content Management (OCM) to Azure Blob Storage** improving scalability and cost efficiency.
- Designed and implemented a seamless data transfer strategy, ensuring minimal downtime and data integrity.
- Collaborated with cross-functional teams to update application logic for Azure Blob integration.
- Wrote Stored procedures to handle OCR extracted data being inserted and updated into tables maintaining data integrity.
- Debugging production issues and provided **Root Cause Analysis (RCA)** with effective fixes.
- **Participated in Disaster Recovery (DR) drills** twice a year to ensure system resilience and business continuity.
- Worked on **complex SQL queries** for generating various automated reports as per Business requirement.
- **Collaborated with the QA team** to identify and resolve bugs, enhancing overall code quality and ensuring a **zero post-production defect rate**.
- **Worked on AI POC** for extracting data from contractual documents using OpenAI.

Project Name: GST Invoices

Purpose: Application to create Invoices for Asset movement in and out of Cognizant.

Tech stack: ASP .Net MVC, ADO .Net, Entity framework, SQL

Role: Software Engineer

Responsibilities:

- Worked on **SAST, CAST and OSS** fixes ensuring no security vulnerabilities in the application.
- Developed a **communication framework** to **automate email notifications** based on Invoice status, improving user engagement and workflow efficiency.
- **Resolved user-reported production issues** and delivered timely **hotfixes** to ensure uninterrupted system performance and stability.
- Estimating story points for the Sprint in Sprint planning sessions.
- **Implemented CSV data import** into **SQL Server (SSMS)** for data validation, ensuring accuracy and consistency in the data during **ECM (Enterprise Content Management) to OCM (Oracle Content Management)**.
- Performed peer reviews to ensure code quality and adherence to best practices.
- Used ADO tool for tracking tasks and bugs.
- Developed branching strategies for merging, deploying releases, and applying hotfixes efficiently.
- Coordinated with the team lead to ensure prompt delivery of sprint goals and tasks.

Education:

B.E. Mechanical Engineering.

SNS College of Technology.

2016-2020.
