PROFILE

Experienced **DevOps Engineer** with a strong background in cloud infrastructure, automation, and continuous integration/continuous deployment (CI/CD). Proficient in leveraging cloud platforms like **AWS**, **Azure**, and **Google Cloud Platform** to build scalable, secure, and high-performance systems. Skilled in containerization with **Docker** and **Kubernetes**, and automation using **Terraform** and **Ansible**. Adept at optimizing workflows, improving deployment pipelines, and ensuring infrastructure reliability. Passionate about staying up-to-date with emerging technologies to enhance productivity and streamline development processes. Strong team player with excellent problem-solving and communication skills.

EDUCATION

Hindustan College of Arts & Science,

Chennai, India

Bachelor of Computer Applications

PROFESSIONAL EXPERIENCE

Ampcome Technologies Private Limited,

Nov 2021 – present | Bengaluru, India

DevOps Engineer

CERTIFICATES

- Python Certification – Softlogic Systems Pvt Ltd (SIA Institute)
- AWS Certified Solutions Architect – Softlogic Systems Pvt Ltd (SIA Institute)
- DevOps Certification – Softlogic Systems Pvt Ltd (SIA Institute)

SKILLS

Cloud Platforms — AWS, Azure, Google Cloud Platform (GCP), DigitalOcean

Containerization & Orchestration — Docker, Kubernetes

CI/CD Tools — Jenkins, GitHub Actions, GitLab CI/CD, CircleCI

Infrastructure as Code (IaC) — Terraform, Ansible, AWS CloudFormation

Monitoring & Logging — Prometheus, Grafana, ELK Stack (Elasticsearch, Logstash, Kibana), AWS CloudWatch

Source Control — Git, GitHub, GitLab, Bitbucket

Networking — Nginx, Apache, Load Balancers, DNS Management

Security — IAM, SSL/TLS, Firewall Configuration, Secrets Management (Vault, AWS Secrets Manager)

Server Management — Linux (Ubuntu, CentOS), Bash Scripting, SSH, Systemd

Languages — Python, Shell Scripting (Bash), YAML

Automation & Scripting — Python for automation, REST API integration

Databases — PostgreSQL, MySQL, MongoDB, Redis

Cloud Databases — AWS RDS, Google Cloud SQL, Azure SQL Database

Database Tools — pgAdmin, DBeaver, SQLAlchemy

SUMMARY

Experienced **DevOps Engineer** with a strong background in cloud infrastructure, automation, and Python development. Proficient in designing, implementing, and maintaining scalable systems using **AWS, Azure, and Google Cloud Platform (GCP)**. Skilled in **containerization** with **Docker** and **Kubernetes**, and experienced in building automated **CI/CD pipelines** using **Jenkins, GitHub Actions, and GitLab CI/CD**. Adept at managing infrastructure as code (IaC) with **Terraform** and **Ansible** to ensure efficient and reproducible environments.

With hands-on experience in deploying and managing **microservices architectures**, I leverage **Python** for automation, backend development, and integration with cloud-native technologies. I have a proven ability to optimize system performance, implement monitoring solutions using tools like **Prometheus** and **Grafana**, and maintain high levels of security and reliability across all stages of the software lifecycle.

A collaborative team player, I thrive in Agile environments, working closely with cross-functional teams to streamline deployments, improve infrastructure reliability, and contribute to the overall success of development projects.

PROJECTS

Strike (Stock Trading Project) [↗](#)

- **Role:** DevOps Engineer
- **Description:** Led the infrastructure setup and pipeline configuration for the **Strike** stock trading platform, ensuring high availability, scalability, and performance under heavy user traffic. Implemented automation for deployment and CI/CD pipelines, improving deployment speed and reliability.
- **Technologies Used:** AWS, Docker, Kubernetes, Terraform, Jenkins, Ansible, Prometheus, Grafana

Centa (Centre for Teacher Accreditation Project) [↗](#)

- **Role:** DevOps Engineer
- **Description:** Worked on the infrastructure management and pipeline automation for **Centa**, a platform focused on teacher accreditation. Streamlined the deployment process through the creation of efficient CI/CD pipelines and infrastructure as code (IaC) to reduce manual intervention and increase system reliability.
- **Technologies Used:** AWS, Terraform, Jenkins, Docker, Kubernetes, GitLab CI/CD, Ansible

Caregigs (Flexible Nursing Career App) [↗](#)

- **Role:** DevOps Engineer
- **Description:** Contributed to the infrastructure setup and pipeline configuration for **Caregigs**, a platform that offers resources and tools for nurses to stay informed and up-to-date on the latest career opportunities and industry trends. Ensured high availability and scalability of the application, improving deployment processes and system reliability.
- **Technologies Used:** AWS, Docker, Kubernetes, Terraform, Jenkins, Ansible, GitLab CI/CD

Orderbit (Wholesale Management Platform) [↗](#)

- **Role:** DevOps Engineer
- **Description:** Contributed to the infrastructure setup and pipeline automation for **Orderbit**, a platform designed to streamline inventory management, order processing, and customer engagement for wholesale businesses. Ensured seamless deployments and high availability of services.
- **Technologies Used:** AWS, Docker, Kubernetes, Terraform, Jenkins, Ansible, GitLab CI/CD

INTERESTS

Learning New Technologies — I enjoy staying updated with the latest trends in technology, especially in DevOps, cloud computing, and AI. I like exploring new tools, frameworks, and languages to improve my skills and stay ahead in my field. | **Fitness & Health** — I prioritize my physical health by staying active through activities like jogging, yoga, and gym workouts. I believe a healthy lifestyle helps me stay focused, energized, and productive in both my personal and professional life.
