- Tambaram, Chennai

EDUCATION

2015-2019-Anna University
Imayam college of Engineering
Bachelor of Engineering in Electronics and
Communication Engineering

SKILLS

- AWS
- GIT, GITHUB
- JENKINS
- MAVEN
- DOCKER
- ANSIBLE
- TERRAFORM
- NEXUS
- KUBERNETES
- SONARQUBE
- SPLUNK
- PROMETHEUS AND GRAFANA

CERTIFICATION

- AWS Certified Solutions Architect – Associate
July 2024 - July 2027

LANGUAGES

- English (Fluent)
- Tamil (Fluent)

CAREER OBJECTIVE

- Excelling in AWS and DevOps with a proficiency in orchestrating cloud environment deployment. Motivated by a fervor for pioneering technologies and dynamic environments. Actively pursuing roles to apply skills, innovate with emerging tools, and make meaningful contributions to drive continuous improvement and deliver impactful solutions.

PERSONAL PROFILE

- Over 3.9 years of extensive experience in AWS, DevOps and Oracle Cloud Engineer specializing in building, deploying, and maintaining cloud environments, emphasizing various DevOps Tools, CI/CD, AWS Architecture, and Container Technologies.
- Implemented and managed Jenkins on Linux instances for automated deployments, ensuring seamless solutions.
- Proficient in leveraging AWS services to enhance scalability, reliability, and security while streamlining DevOps processes.
- Skilled in implementing DevOps best practices to automate infrastructure provisioning, configuration management continuous integration/continuous deployment (CI/CD) pipelines. Proficient with tools like Terraform, Ansible, Jenkins, and Git.
- Hands-on experience with containerization technologies such as Docker and Container Orchestration Platforms like Kubernetes. Capable of designing resilient microservices architectures.
- Capable in implementing security best practices and compliance standards on AWS, including IAM policies, encryption, network security, and auditing.
- Effective communicator and team player with a collaborative approach to problem-solving. Proven capability to lead cross-functional teams and drive projects from conception to successful implementation.

WORK EXPERIENCE

3i InfoTech Ltd Executive

2022-2024

DEVOPS ENGINEER

- Completing the migration from on-premises infrastructure to AWS cloud, while establishing a robust continuous delivery pipeline (CI/CD) tool.
- Orchestrating the installation, configuration, and management of Jenkins on Linux instances to comprehensively automate deployments.
- Fostering cooperation with application teams to encourage container adoption, providing guidance and supervising deployments.
- Tailoring the configuration of Kubernetes/EKS clusters, with a focus on performance, high availability, and stability.
- Supervising Docker maintenance and releases to guarantee uninterrupted service in non-production environments.
- Utilizing Jenkins pipelines for Docker builds in Jfrog Artifactory repository, managing deployments via ECR repo and ECS clusters and ansible for managing web applications, configuring environments, and automating provisioning, patching, and software deployment on AWS.

- Proving expertise in Infrastructure as Code (IaC) principles with Terraform and CloudFormation for efficient environment setup.
- Collaborating on the formulation of release plans with stakeholders, including Project Management, Development, and QA teams.
- Administering and configuring SCM tools such as SVN and Git, resolving code merging issues in coordination with application developers .
- Strong Experience Groovy Scripts.

Factals Infotech Solutions

2019-2022

DEVOPS ENGINEER

- Linux/Windows/Ubuntu servers on Amazon EC2 & monitor through SNS & Amazon Cloud Watch.
- Creating/Managing AMI/Snapshots/Volumes, Upgrade/downgrade AWS resources (CPU, Memory, EBS). Setup/Manage Databases on Amazon RDS.
- Used Ansible to do configuration and to automate deployments.
- Worked on creating Kubernetes cluster from end to end.
- Manage and configure AWS services as per the business needs (ELB, Route53, S3, Cloud Watch, IAM, VPC) in Global infrastructure.
- Handling L1 and L2 level issues, involved in the client calls, done several deployments, resolving the tickets to ensure system availability as per multiple Service Level Agreements (SLA).
- Worked on Pod Creation and managing Containers.
- Implemented continuous delivery pipeline involving Jenkins, Ansible to complete the automation from commit to deployment.
- Coordinate or assist the developers with establishing and applying appropriate branching, merging conventions by using GitHub.
- Maintaining the source code in GIT for various applications.
- Responsible for creating the branches and tagging the code.
- Assisted developers with establishing and applying appropriate branching, labelling convection's using GIT source control.
- Build the code by using Maven.
- Implemented and supported CI process via Jenkins.
- Administrated and Implemented CI tools Jenkins for automated builds and also integrating Unit tests and Code Quality Analysis Tools like SonarQube.
- Hands on working experience on Web Server (Apache), Application Servers (Tomcat, NGINX), and DB Server (MySQL).
- Documented the entire installation process for various tools and provided on-call support.
- Used Jira as a ticketing tool.
