EDUCATION

2012 - 2016

CALICUT UNIVERSITY

- B-Tech in Electronics & Communication Engineering

SKILLS

- AWS
- Docker
- Jira
- Jenkins
- Sonarqube
- Confluence
- CANoe
- Lauterbach
- DLT Viewer/DLT Log
- CI/CD pipeline
- Version control
- Release Management
- Agile Software Development
- Scrum methodologies
- ITIL

CERTIFICATIONS

- Google Certified Associate Cloud Engineer
- Published manuscript in IRJET

PROFILE

Senior Integration Engineer with 6+ years of hands-on experience in supporting, automating, and optimizing mission critical deployments using Docker, leveraging configuration management, CI/CD pipeline and DevOps processes.

Function directly with agile application development and scrum methodologies. Experience in version control tools such as git, GitHub, GitLab and Bitbucket. Project management using Jira. Static code analysis using Sonarqube. Create pipelines in Jenkins and Bamboo. Experience in Confluence. Google Certified Associate Cloud Engineer. Knowledge in ITIL, ITSM, ISO 20000, ISO 27000 and ISO 9000.

WORK EXPERIENCE

ACSIA Technologies, Thiruvananthapuram

2021 - PRESENT

Integration Engineer

- Support various projects, identify business needs and propose IT solutions to evaluate client's existing components and ensure that final solutions meet organizational needs.
- Review, manage code in GitHub on each Pull Request created, check every quality gate which is defined in Integration test plan. These are mainly BVT, BAT, UTs, SWITs, static code analyses and code review.
- Prepare each release with reviewed and approved contents in GitHub, trigger release, take build and update changes in Gerrit topic. Trigger SINT build, announce Release Candidate and finally raise Integration Request.
- Report, assign, track and monitor bugs or defects in Jira for software releases.
- Defect analysis using DLT viewer and DLT log analysis.
- Collaborate with other functional leaders, product owner and project manager to identify system improvements and enhancements and recommend and implement solutions.
- Document all release activities, processes and workflow in Confluence for the future reference.

STJ Electronics Pvt. Ltd, New Delhi

2017 - 2020

Devops Engineer

- Work closely with Product Management, Development and QA team to implement CI/CD pipeline in order to refine and improve software development.
- Function directly with Agile Application Development and SCRUM methodology to provide daily support aligned with the model of continuous delivery.
- Co-ordinate with Development engineers to scale-up build test automation practices using Bamboo to speed-up the software delivery.

- Work in Docker platform to provide service products that uses OS-level virtualization to deliver software in packages, i.e., containers.
- Experience in OS and Firmware compilation using Bamboo Remote Agent to automate test and for release.
- Managed Bitbucket repositories and permissions, including branching, merging and tagging.
- Act as Static Code Analyzer using Sonarqube for continuous inspection of code quality to perform automatic reviews with static analysis of code to detect bugs, code smells and security vulnerabilities.
- Work with Release Manager to improve build, automation and to reduce bottlenecks in delivery pipeline.

• **Aeterna Solutions Pvt. Ltd, Thrissur**

2016 - 2017

PHP Developer
