SUMMARY

Senior Frontend Engineer with 6+ years of experience building scalable web and mobile applications for startups and enterprise clients across the US, UK, Ireland, Saudi Arabia, and India. Specialized in React.js, React Native, Next.js, Angular, Capacitor and modern frontend architecture, with proven expertise in design systems, micro-frontends, and cross-platform solutions. Open-source contributor (RN-GPay, mParticle) with a strong track record in performance optimization, CI/CD pipelines, and developer experience improvements. Adept at bridging design and engineering to deliver intuitive, high-performance products, while mentoring teams and driving code quality.

SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS
- **Frontend Frameworks & Libraries:** React, Next.js, Angular (15–19), Redux, Zustand, NgRx, Ionic
- **UI & Styling:** Tailwind CSS, MUI, Ant Design, PrimeNG
- **Testing & DevOps:** Jest, SonarQube, Jenkins, Azure Pipelines, Sentry
- **Databases:** PostgreSQL, MySQL, MongoDB, Firebase
- **Backend & APIs:** Node.js, NestJS, Neon DB, Strapi, Sanity.io, RESTful API, GraphQL (Hasura)
- **Other Tools & Platforms:** Electron, React Three Fiber (Three.js), Agora RTC

EXPERIENCE

- **React Lead Engineering, PracticeTek, June 2025 – Present**
 - Responsible for front-end technical direction and architecture.
 - Owned and engineered the Form Builder platform, including its component structure, data flow, and integration with backend services.
 - Collaborate with backend teams working in Django and help shape database strategy.
 - Currently leading the architecture and development of the company's chatbot system, shaping its front-end experience, internal tooling, and integration patterns.
 - Advise on infrastructure decisions, ensuring solutions avoid dependencies like AWS.
 - Establish coding standards, best practices, and front-end development workflows for the engineering organization.
 - Work closely with a team of 11 engineers, with direct leadership over 2 team members.
 - Provide mentorship, code reviews, architectural guidance, and support across cross-functional teams.
 - Drive innovation and maintain a clear technical vision for Practicetek's product ecosystem.
- **Senior Software Engineer – Frontend, VRIZE Technologies Private Ltd, September 2022 – March 2025**
 - Mentored junior developers and conducted PR reviews.
 - Lead a team of engineers across projects (max. 5 members)
 - Collaborated on HLD/LLD architecture
 - Connect with clients and discuss upcoming requirements and technical feasibility
 - Implemented best practices for code quality, including unit testing and integration testing
 - Identified and resolved critical production issues, ensuring high availability and reliability.
- **Frontend Engineer, Raftlabs, July 2021 – August 2022**
 - Collaborated on HLD/LLD architecture
 - Optimized application performance, reducing load times and improving user experience.
 - Implemented CI/CD pipelines for frontend deployment, reducing release times and errors.
 - Worked closely with backend teams to integrate APIs and ensure seamless data flow.

- Defined and enforced component libraries and design systems for consistency across projects.
- Managed project timelines, tracked progress, and reported status to stakeholders.
- **Systems Engineer – Infosys Limited, July 2019 – July 2021**
 - Contributed to internal coding initiatives through Infosys’ “Accelerate” program, enabling technical contributions beyond assigned project work.
 - Worked on Database support and query optimizations for clients like Goldman Sachs and Genesys Cloud.

RECENT PROJECTS

- **PracticeTek – ChatBot (Healthcare)**
 - Architected and developed a lightweight, embeddable chat widget using React 19, TypeScript, and Vite, enabling seamless integration into any website with a single script tag.
 - Engineered real-time communication by building a custom WebSocket hook with auto-reconnection, connection status tracking, and graceful disconnect handling, achieving reliable message delivery.
 - Implemented dual-mode chat system supporting both AI bot conversations and live agent handoff, including automated escalation logic when agents are unresponsive.
 - Designed scalable component architecture with separation of concerns—custom hooks for business logic, reusable UI components, React Context for auth state, and React Query for server state management.
 - Built responsive, accessible UI using Tailwind CSS with smooth animations, dynamic theming via CSS custom properties, and mobile-first design (full-screen mobile, windowed desktop)
- **PracticeTek – FormBuilder (Healthcare)**
 - Analytics Dashboard Development - Built the complete analytics dashboard with performance metrics, web traffic visualization, traffic sources, user locations, and top pages tracking using charts (Recharts) and grid layouts (react-grid-layout)
 - Implemented full chat management functionality.
 - Created the [useIframeThemeSync](#) hook for iframe-parent theme synchronization, enabling seamless dark/light mode switching across embedded contexts
 - Worked on login flow enhancements, cache removal logic, and redirection handling for better user experience
 - Various fixes including scroll functionality for form tools, height fixes, conditional rendering UI, card customization with resize/move functionality, and dark mode text styling
- **Zaxby’s (Fast-Food Chain, USA, 1M+ users, VRIZE) (E-commerce / Digital Ordering with Payments & FinTech-lite)**
 - Led frontend development on React Native across Android & iOS platforms.
 - Upgraded core project from v0.68 → v0.73, improving performance and stability.
 - Converted Google Pay Web APIs to React Native, publishing rn-gpay for wider use ([npm link](#)).
 - Enhanced mParticle SDK via open-source contributions and integrated Braze, Amplitude, and AppsFlyer for advanced analytics.
 - <https://github.com/mParticle/react-native-mparticle/pull/196>
 - Architected solutions for performance optimization and enforced code quality via SonarQube.
 - Built a reusable UI component library, ensuring consistency across platforms.
- **Binder (VRIZE) (B2B Procurement Platform, E-commerce, Supply Chain & Retail Focus)**
 - Served as Lead Frontend Developer across web (Angular) and mobile (Ionic Angular).
 - Created reusable component libraries: PrimeNG + Tailwind (web) and Ionic (mobile).
 - Upgraded Angular 15 to 19, introducing standalone components and routing optimizations.
 - Implemented improved storage handling with services/tokens for better scalability.
 - Set-up Azure pipelines for frontend build and deployments

OPEN-SOURCE CONTRIBUTION

- <https://github.com/mParticle/react-native-mparticle/pull/196> - Set location events for mParticle SDK React-Native wrapper.
- <https://www.npmjs.com/package/rn-gpay> - Updated wrapper package for Google Pay for React-Native.

EDUCATION

Bachelor of Computer Applications (BCA)

Mahatma Gandhi University, Kottayam • Kottayam, Kerala, India • 2016 - 2019
