PROFESSIONAL SUMMARY

Full-stack Software Engineer with 5 years of experience building scalable, user-focused products. Strong frontend background with growing backend expertise, recognized for technical ownership, driving high-quality outcomes in fast-paced teams, and a consistent focus on performance, quality, and user experience.

EXPERIENCE

Software Developer, dSPACE, Trivandrum

Jan 2023- Present

- Built and maintained a centralized UI component library using **React**, **TypeScript**, **Emotion CSS**, and **Storybook** to ensure visual consistency, reuse, and faster delivery across services.
- Integrated and customized enterprise authentication flows with **Azure B2C**, aligning security, branding, and user experience requirements.
- Designed and implemented an end-to-end quality strategy combining **Playwright** (E2E), **Artillery** and **K6** (performance), and cross-browser validation, fully integrated into **Azure DevOps CI/CD pipelines** to improve reliability and release confidence.
- Actively participated in code reviews and cross-team pull requests using **Git**, improving code quality, consistency, and integration stability.
- Led the frontend development for the first release of the License Management service, delivering **15+ features** across two core screens using our **UI component library**, **Redux Toolkit**, and **RTK Query** for reliable API integration and data handling.
- Implemented backend functionality for **2+** key workflows, including building REST endpoints with **C# / .NET**, integrated via a **Dapr sidecar**, and adding unit tests using **NUnit** to ensure correctness and reliability.
- **Technologies used:** React, TypeScript, Emotion CSS, Storybook, Vitest, Playwright, Artillery, K6, Redux Toolkit, RTK Query, C#, .NET, Dapr, NUnit

Product Engineer, Aveta AI, Trivandrum

Jan 2022- Dec 2023

- Built and maintained **responsive front-end components** using **React.js**, **Redux**, and **Material UI (MUI)**.
- Integrated **REST APIs** and developed custom UI elements tailored to dynamic user needs.
- Delivered 10+ feature-rich UI modules independently, contributing to rapid product releases.
- Collaborated with backend teams for smooth **API dependency management** and efficient workflows.
- Improved code maintainability by adhering to clean code practices and participating in code reviews.
- Successfully executed all tasks on-time across 10+ Agile sprints and deployments.
- **Technologies used:** React.js, JavaScript, Redux, Java, Spring Boot

Associate Engineer, L&T Technology Services

Nov 2020 – Jan 2022

- Automated Excel-based reporting and data workflows using Python, reducing manual effort by 60%.
- Developed scripts for shared folder cleanup and email alerting, improving data hygiene across 15+ teams.
- Supported CI setup for BMW's infotainment systems, integrating Git, SVN, and Jenkins to stabilize daily builds.
- **Technologies used:** Python, SVN, Git, Jenkins

EDUCATION

B. Tech in Electronics and Communication Engineering

October 2020

Model Engineering College, Kochi

SKILLS

- **Frontend:** React, Redux, TypeScript, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Emotion CSS, Material UI, Storybook
- **Backend:** C#, .NET, NestJS, Prisma, SQL, GraphQL, Java, Python
- **Testing:** Vitest, Jest, Playwright, Artillery, K6, NUnit
- **DevOps & Tooling:** Git, Docker, Azure DevOps
- **Delivery & Collaboration:** Agile, Scrum

PROJECTS

Asset Tracker – Asset Management Tool

Duration: 2 Months

- An internal asset management platform to track, manage, and monitor company assets across their lifecycle.
- **Role:** Full stack Developer
- **Technologies used:** React, Typescript, NestJS, Docker
