Professional Summary

Experienced Senior Software Engineer with over 7 years of proficiency in React.js, Javascript, CSS, HTML, Next.js, Redux and Tailwind css. Proven track record of developing scalable and user-centric platforms. Adept at collaborating with cross-functional teams, optimizing performance, and mentoring junior developers to deliver high-quality solutions that exceed client expectations.

Employment History

Associate Staff Software Engineer, Keyvalue Software Systems, Kochi

Present

As an Associate Staff Software Engineer specializing in frontend development, I collaborate with cross-functional teams to create intuitive, high-performance user interfaces. I leverage my expertise in modern web technologies to build scalable and maintainable codebases, ensuring a seamless user experience across various platforms. My role involves optimizing application performance, implementing responsive designs, and mentoring junior developers to uphold best practices in coding standards. I am committed to delivering high-quality solutions that align with client requirements and exceed expectations.

Senior Software Engineer, KeyValue Software Systems, Kochi

04/2021 - 08/2021

- Lead the design and implementation of complex software solutions, providing technical leadership and mentoring junior team members.
- Collaborate with cross-functional teams to understand project requirements, conduct code reviews, and ensure the delivery of high-quality software solutions within established timelines.
- Continuously contribute to architectural decisions, troubleshoot technical issues, and optimize code and system performance.

Software Engineer, KeyValue Software Systems, Kochi

08/2019 - 03/2021

- Develop and maintain scalable and efficient software solutions, adhering to coding standards and best practices.
- Collaborate with cross-functional teams to analyze project requirements, conduct thorough testing, and troubleshoot technical issues, ensuring the timely delivery of high-quality software.
- Proactively participate in code reviews, contribute to system architecture decisions, and stay updated on industry trends and emerging technologies.

Associate Software Engineer, KeyValue Software Systems, Kochi

06/2017-08/2019

- Responsible to support and work under the direction of the senior software engineer by providing services related to software programming.
- Technical knowledge and expertise in having a command over programming languages like Javascript, React JS, Redux, HTML, CSS, etc.

Project details

•Ecommerce Domain

I worked on multiple e-commerce web applications for various companies, starting each project from scratch. These applications were designed to manage a wide range of e-commerce functionalities, including product management, inventory control, customer engagement and integrations with third party applications like facebook, whatsapp and shopify. I ensured the development of responsive, high-performance user interfaces, delivering a

seamless user experience tailored to each client's needs. My role spanned the entire development lifecycle, from initial setup to final deployment, contributing to the successful launch and operation of these platforms.

Technologies used: React.js, Next.js, Tailwind CSS, JavaScript, TypeScript, Material-UI, Redux, Redux-saga

- **Logistics Domain**

These platforms were designed to streamline logistics processes such as shipment coordination, warehouse management, and real-time tracking. I played a key role in ensuring that the user interfaces were not only intuitive but also optimized for performance, providing users with a smooth and efficient experience. My responsibilities encompassed the entire development process, from the initial concept through to deployment, resulting in robust solutions that effectively supported logistics operations.

Technologies Used: React.js, CSS, HTML, JavaScript, TypeScript, Material-UI

- **Taxation**

Contributed to the development of a web application that manages the majority of taxation processes for a country, catering to both individuals and companies. The platform was designed to ensure accurate and efficient tax calculations and submissions.

Technologies used: React.js, JavaScript, HTML, Redux, Redux-saga

Education

B-Tech, VISAT, Kochi

08/2013 - 06/2019

Diploma, Govt. Polytechnic college Kaduthuruthi, Kottayam

08/2011 - 06/2013

Higher Secondary, MGM NSS HSS Lakkattoor, Kottayam

06/2009 - 03/2011

SSLC, St Joseph's HS Mattakkara, Kottayam
