PROFILE SUMMARY

I have around 5 years of experience as a Frontend Developer, specializing in developing and designing user experiences for applications. I have developed most of the applications using React JS and provided end-to-end support to project teams in various aspects of application development to ensure successful delivery.

SKILLS

Web Technologies: React JS, TypeScript, JavaScript, HTML5, CSS, Node JS.

React UI Framework: Ant Design, Material UI, Tailwind CSS.

Database: MySQL.

Software Development Life Cycle: Agile Scrum.

Architecture: REST API, GraphQL

PROFESSIONAL EXPERIENCE

UST

Developer III – Software Engineering

Chennai, TN

Feb 2025 – Present

Lumel Technologies Inc

Product Developer

Chennai, TN

June 2022 – Jan 2025

Maestro Technology Services Private Limited

Frontend Developer

Coimbatore, TN

Sep 2020 – May 2022

PROJECTS

1. Albertsons

The goal of this project is to develop an admin panel for item creation and user management. Essentially, it is for one of the largest food and drug retailers in the United States.

Technologies used: React JS, TypeScript, GraphQL, Java

Library used: Redux, Tailwind CSS, Formik.

Contributed to the development of a displayer module, resolved critical bugs using React and Tailwind CSS, and wrote unit test cases to improve code coverage.

2. Inforiver-Enterprise

The goal of this project is to develop an Inforiver visual Power BI report to schedule reports for email, OneDrive, SharePoint, and Google Drive storage. Additionally, it includes creating an admin console to manage schedules and users.

Technologies used: React JS, TypeScript, Node JS.

Library used: Redux, Tailwind CSS, CodeMirror, Draft Editor, React Table, Formik.

Contributed to the development of a custom font module to support for Inforiver visuals and also fixed major bugs in the existing module, which is using React, Tailwind CSS. Additionally, I took ownership of the admin console frontend and conducted frontend code reviews.

3. AMR Technology

The project's goal is to manage water readings, manage users and sub users. Also, users can be able to view, download reports.

Technologies used: React JS, Python.

Library used: Material UI, React Table, Formik, React Charts, Axios.

Maintained the front-end of the application and developed additional features for the report module and sub-user module.

4. Rawcaster

This application gives you a place to virtually interact, have conversations, conduct events, and take part in them while simultaneously enabling you to broadcast your ideas to the entire globe.

Technologies used: React JS, Node JS.

Library used: Ant Design, Socket IO-client, Formik, Axios, Redux.

Contributed to the development of the live streaming, talk show, and event modules using WebRTC, Kurento Server, and WebSockets.
