SUMMARY

Frontend Software Engineer with 4+ years of experience building scalable React and TypeScript applications for SaaS and healthcare platforms, including **telehealth** and RPM systems. Specialized in high-performance UI architecture, micro-frontends, and state management.

SKILLS

Languages: JavaScript (ES6), TypeScript
Frontend: ReactJS, Next.js, HTML5, CSS3, SASS, Micro-frontends, Context API
Libraries: Material UI, Tailwind CSS, Bootstrap, Headless UI, Redux Toolkit, Zustand, Axios, Formik
Tools: Git, GitHub, Nx, Webpack, Vite, Jira, Postman, Figma, Swagger, Hopscotch.
Backend: NodeJS, ExpressJs
Database: PostgreSQL, MongoDB
ORM/ODM: Sequelize, Mongoose

EXPERIENCE

Sr. Software Engineer *Firminiq Systems*

01/2025 - Present

- Contributed to the frontend development of a greenfield **SaaS healthcare** platform currently in the product development and client acquisition phase.
- Building scalable, responsive UI components using React, TypeScript, and Material UI.
- Collaborating with backend and product teams to integrate REST APIs and define application workflows and user experience.

Software Engineer *NeolTO InfoTech*

07/2021 - 11/2024

- Led front-end development and enhancement of Happilee, scaling to 250+ clients for high performance and seamless UX.
- Converted requirements into high-quality code aligned with business needs.
- Built cross-platform, responsive web pages using Vite and Webpack.
- Conducted code reviews, debugged issues, and delivered optimized solutions.

PROJECTS

MyVitalRx

ReactJs, TypeScript, MaterialUI, Sass, Nx

01/2025 - present

- A multi-organization healthcare SaaS platform that streamlines onboarding, user management, and operational workflows across diverse healthcare entities.
- Core modules include patient detail pages with patient and medication history, appointments, and **audio/video consultations** for **remote patient monitoring**.

Happilee

ReactJs, TypeScript, TailwindCss, Sass, unit testing, state-pool, micro-frontends, webpack

02/2022 - present

- SaaS WhatsApp chatbot platform used by **250+ client organizations**.
- Web application supports **chatbot configuration, analytics dashboards, and campaign management**.

Gloria Educations

ReactJs, TypeScript, TailwindCss, zustand, NextUI, vite

3 months

- A staff management application designed to monitor both student progress and staff activities.
- Independently managed all phases of the project, including frontend architecture design, UI/UX development and API integration
