

DIVYA NINAN

Frontend / Full-Stack Developer (React | Next.js)

■ +91 8086681156 | ■ divyasiby2010@gmail.com | Kochi, Kerala

Professional Summary

Frontend-focused React & Next.js Developer with 4+ years of experience building scalable, high-performance web applications. Strong expertise in React, TypeScript, Next.js, Redux, SSR, and modern UI frameworks. Proven experience delivering production-grade enterprise applications, optimizing performance, and collaborating in Agile teams. Comfortable working across the full stack when required.

Professional Experience

SOFTWARE ENGINEER | Big Formula Solutions, Kochi | Nov 2023 – Present

Project: DIFC Courts – Dubai International Financial Centre Courts (<https://eregistry.difccourts.ae>)

Tech Stack: React TypeScript, Redux, Next.js, Material UI, SASS

- Core contributor to a mission-critical government platform used for digital case and registration management.
- Developed and maintained Cases, Wills, and Registration modules with complex business rules and validations.
- Implemented SSR, memoization, and code splitting, significantly improving rendering and load performance.
- Built reusable UI components following scalable design patterns.
- Delivered internal enterprise tools (Room Booking, Annual Report) using Next.js.
- Actively involved in production support, bug fixing, and feature enhancements.
- Collaborated with BAs, backend developers, QA, and designers in an Agile environment.

· **ASSOCIATE SOFTWARE ENGINEER** | Experion Technologies, Kochi (Contract for Indocosmo Systems) | Dec 2022 – Nov 2023

Project: IFC Global Logistics & Warehousing, Australia (<https://www.ifc.com.au>)

Tech Stack: React TypeScript, Redux, jQuery, Material UI, Formik

- Developed and deployed UI modules for IFC Global Logistics, a supply chain and warehousing management system in Australia.
- Contributed through all phases of the project lifecycle — from design and development to go-live deployment and post-production support.
- Implemented real-time shipment dashboards and data-driven forms with reusable React components and validation logic.
- Collaborated with cross-functional teams including analysts, designers, and backend developers to ensure smooth workflow delivery.
- Provided hands-on production support for two months post-launch, maintaining system reliability and user satisfaction.

ASSOCIATE SOFTWARE ENGINEER | Indocosmo Systems, Kochi | July 2022 – Nov 2023

Project: Init Suite, MedeServer Pharmacy

Tech Stack: Next.js, PostgreSQL, Redux, Chart.js, Tailwind CSS

- Developed a comprehensive dashboard for Init Suite software used by bakery, restaurant, and hotel businesses.
- Enhanced MedeServer Pharmacy (Capsule) application, streamlining billing and operations across multiple pharmacies.
- Used Chart.js for interactive data visualization and PostgreSQL for efficient data management.
- Implemented responsive UI layouts using Tailwind CSS for faster, consistent styling across modules.

INTERN | Soften Technologies | Jan 2022 – June 2022

Project: CRM Software for Sales Management

Tech Stack: Next.js, Node.js, MongoDB

- Developed a fully functional CRM software using Next.js with frontend and backend integration.
- Implemented user authentication, data visualization, and responsive UI for enhanced user engagement.

Collaboration & Delivery Highlights

- Strong exposure to Agile methodology including sprint planning and daily stand-ups.
 - Effective communication with clients, business analysts, and QA teams for requirement validation and delivery.
 - Delivered multiple projects from concept to live production with continuous improvement.
-

Other Experience

OPERATIONS HEAD | Way WeDesign Pvt Ltd , Kochi | July 2020 – Dec 2021

Managed digital marketing operations, coordinated campaigns, vendor communication, and team reporting. Worked closely with management and sales teams to ensure timely delivery and performance tracking.
