Phone No. : 8137941923

Malappuram, Kerala, India

Summary

Senior software engineer with 4 years of hands-on experience in designing and developing robust web applications using React, Java Spring Boot. Skilled in creating and implementing responsive user interface components with React concepts and building secure, scalable backend services with Spring Boot. Proficient in identifying user requirements, ensuring seamless web-based interactions, and delivering high-performance applications through end-to-end development. Looking forward to adding value through my passion and expertise.

Skills

Technologies/Languages : React, JavaScript, TypeScript, HTML5, CSS, SCSS (Sassy CSS), Emotion-Styled Components, Redux, Java (Spring Boot), C#.

Platforms : VS code, IntelliJIDE, Eclipse (Spring tool suite), Postman, Rider, AWS, Github, Kibana, Splunk, DataDog.

Database : PostgreSQL, MySQL.

Testing : Junit, Jest, Cypress.

Experience

Senior Software Engineer

IBS Software . Kochi, Kerala

09/2024 - Present

- Designed and implemented new features in React.js, Spring Boot, and .Net for a lodging web application, integrated backend functions to support seamless front end interactions
- Experienced in React testing tools Jest and Cypress for unit and integration testing to ensure code quality.
- Took a lead role in upgrading multiple Spring Boot applications from Java 8 to Java 21, enhancing performance, improving security, and ensuring long-term support.
- Developed and enhanced backend functionality in Spring Boot, Kotlin, and .NET applications to support robust business logic and improve system reliability. Integrated APIs with frontend interfaces in React.js,
- Proactively resolved client-reported issues to ensure performance, stability, and seamless user experiences.
- Monitored and analyzed application logs using Splunk, Kibana, CloudWatch to identify issues, Leveraged AWS services like ECS, EKS, S3 buckets and deployed application tasks efficiently.
- Understanding of deployment workflows using Spinnaker pipeline and TeamCity.
- Followed Agile methodologies, actively participating in sprint planning, daily stand-ups, and retrospectives while coordinating with clients to gather requirements, prioritize tasks, and deliver efficient solutions. Familiar with Jira for organizing tasks and tracking workflow.

Senior Software Engineer

IBS Software . Trivandrum, Kerala

07/2023 - 09/2024

- As part of code refactoring and bug fixing efforts, restructured logic to enhance code readability and efficiency while resolving issues identified during functional and system testing.
- Mentored junior Software Engineers by providing knowledge on the application requirements and fostered them in improving skills in React TS.
- Designed and developed an AI-driven full-stack flight, car rental, and hotel booking application with a React.js frontend and Spring Boot backend, integrating a Meta Llama-powered chatbot from Amazon Bedrock to process user inputs and dynamically generate request bodies for REST APIs.

- Developed intuitive React.js interfaces, incorporating reusable components and an interactive chatbot area to enhance user experience.
- Engineered REST APIs with controller, service, and DAO layers, including DTOs and entity classes for seamless database communication, while also designing an efficient database schema and implementing message queuing using Apache ActiveMQ.

Software Engineer

IBS Software . Trivandrum, Kerala

09/2021 - 06/2023

- Redesigned a flight booking desktop application with 700+ screens into a single-page web application using React and TypeScript, collaborating closely with Business Analysts and cross-functional teams to align with business requirements and ensure seamless API integration.
- Developed reusable, responsive UI components, optimized performance through manual testing and debugging, and implemented best practices using Redux - Toolkit for state management, React-Router for navigation, and SASS/SCSS with Emotion for styling, while maintaining code quality with ESLint and Stylelint.
- Contributed to the development of a Spring Boot application by creating YAML configuration files, implementing DTOs for data transfer, and developing service layer logic.
- Experienced in using Redmine and Jira for task management, tracking progress, and collaborating within development teams.

Achievements & Recognitions

- Two times **Band-5** employee (highest banding in IBS).
- **Team Champ Award** for the period January to April 2022 - For coming up with solutions to problems, showing extra commitment, putting in efforts to achieve results beyond expectations and for taking initiative that made a positive impact on the team.
- **Appreciation Badge: Passionate** - Demonstrated strong ownership by proactively driving tasks to completion ahead of deadlines with efficiency and accountability.
- **Appreciation Badge: Team Player** - For being an active part of the team during the bug fixing and providing valuable suggestions and solutions.
- **Client Appreciations** : Received client appreciation for quick learning, diligent effort, and effectively analyzing live production issues to identify root causes, earning recognition for quickly establishing a unique value within the team despite being a recent addition.

Education

- **B Tech in Computer Science Engineering - (8.86 CGPA)**
MES College Of Engineering - APJ Abdul Kalam technological university ,Kerala 07/2021
- **Higher Secondary Education : Computer Science - (95% marks)**
IKT HSS Cherukulamba , Kerala 07/2017
- **High School : SSLC**
MSP HSS Malappuram , Kerala 06/2017
