## PROFILE

Results-driven Fullstack Developer with 10+ years of experience delivering high-performance web applications for various business sectors. Proficient across modern PHP and JavaScript ecosystems with experience in Docker and Kubernetes. Expert in frontend performance optimization and SEO best practices. Proven track record of leading cross-functional teams, mentoring junior developers, and building scalable solutions that drive measurable business outcomes through clean code and user-centric design.

## TECHNICAL ACHIEVEMENTS

- Led full-stack development of web applications using WordPress, Drupal, Laravel, and modern JavaScript frameworks, with deployment via Docker and Kubernetes
- Improved site performance by 30% through frontend optimization and Core Web Vitals enhancement
- Mentored junior developers while collaborating across cross-functional teams and managing technical decisions independently

## EMPLOYMENT HISTORY

### Senior Software Programmer, Bridge Global

2021 - PRESENT

- Deliver end-to-end PHP-based web solutions using WordPress, WooCommerce, and Drupal, including custom theme and plugin development with version control via Git
- Integrate AngularJS, Vue.js, and Node.js/Express for interactive UI components and lightweight backend services as project requirements dictate
- Conduct cross-stack debugging and performance tuning to enhance speed, stability, and Core Web Vitals metrics.
- Coordinate with QA, DevOps, design, and product teams through GitLab, GitHub, and Trello while driving independent technical decisions.
- Guide junior developers through code reviews and hands-on support across frontend, backend, and CMS best practices.

### Web Developer, Cresmo Solutions

2018 - 2021

- Built and maintained responsive websites using WordPress, Laravel, CodeIgniter, OpenCart, and other PHP frameworks.
- Designed and implemented custom WordPress plugins & themes tailored to client specifications.
- Constructed mobile-first frontend interfaces using Bootstrap and Foundation ensuring cross-browser compatibility.
- Built client-friendly sites using Elementor and Visual Composer for easy no-code editing.
- Mentored junior developers and conducted code reviews to uphold quality standards.
- Diagnosed and fixed performance, functionality, and compatibility issues.

DATABASE

- MySQL
- MariaDB

DEVOPS & TOOLS

- GIT
- Docker
- Kubernetes

HOBBIES

- Sports (Football, Cricket)
- Fitness
- Music

Web Developer, Crezom Technologies

2014 - 2018

- Developed and maintained dynamic web applications to enhance user experience.
- Implemented responsive design principles to ensure compatibility across devices.
- Optimized website performance, resulting in a 30% increase in load speeds.

LATEST PROJECTS

Trillium Clinic

19+ MONTHS

About Project

The Trillium project is a WordPress-based website showcasing dermatology services across multiple U.S. locations. Built using Elementor and custom plugins, the site emphasizes user engagement and accessibility while offering unique features like detailed service information and location-based navigation. Optimized for SEO and speed, Trillium ensures high performance, improved visibility, and a seamless user experience for patients seeking expert dermatological care.

Responsibilities

Lead the development of a WordPress site, utilize Elementor and custom plugins for flexibility and enhanced functionality, organize service listings to ensure clear and accessible information, ensure a seamless user experience through intuitive design and functionality, collaborate with the team to meet project deadlines and work closely with the client to address specific requirements and ensure their satisfaction.

Cyber Insurance Company

4 MONTHS

About Project

This is an advanced administrative software solution tailored for insurance companies within the domain. It offers specialized portals, including the Underwriter Portal and Broker Portal, along with a comprehensive suite of modules encompassing Security, Brokerage, Quotation, and Policy Management, among others.

Responsibilities

- Developed responsive and functional UI components for internal administrative tools.
- Debugged frontend code to resolve bugs, improve performance, and ensure consistent behavior.
- Collaborated with cross-functional teams to implement user-facing features aligned with business requirements.
