PROFILE

Senior Software Developer with 5.8 years of experience building, optimizing, and maintaining scalable, production-grade web applications. I have experience in ReactJS (Redux, Hooks, Axios), Node.js (Express.js, Passport-JWT, Lodash), PHP (CodeIgniter), and Java (Spring Boot). I'm a quick learner who approaches problems with decisiveness and a strong sense of ownership. I am passionate about keeping up with new technologies, learning continuously, and using tools and practices that improve software quality. I value teamwork and believe in collective effort to achieve common goals.

TECHNICAL SKILLS

Coding Languages

C

Javascript

TypeScript

PHP

Web Technologies - Frontend

ReactJS

HTML

CSS

Material UI

Bootstrap

Web Technologies - Backend

Node.js

ExpressJS

CodeIgniter

Database

MongoDB

Jest

EXPERIENCE

Enphase Energy, Inc.

Senior Engineer, IT

JANUARY 2025 - NOVEMBER 2025

- Owned the improvement and maintenance of multiple production-grade enterprise applications which include PHP CodeIgniter-based Work Management System (WMS) and Professional Engineer Job Tracker (PE Job Tracker), and a Java Spring Boot-based application called New Product Introduction (NPI).
- Improved performance and user experience by identifying and improving slow WMS modules.
- Redesigned the messaging system in the PE Job Tracker with a modern interface that is easy to use. This change improved usability and helped in better communication.
- Added new features such as sharing audit data through email and fixed several critical bugs in the NPI, which improved stability and reliability.

UST

Developer III - Software Engineering

NOVEMBER 2022 - JANUARY 2025

- Worked as a Vendor Consultant, Software Developer for Enphase Energy. Contributed to developing and maintaining critical enterprise applications.
- Improved and maintained the PHP CodeIgniter-based WMS. Added important features such as QA check workflow and several business critical reports including QA report, productivity report, and real-time unit report.
- Improved and maintained the PHP CodeIgniter-based PE Job Tracker. Set up and provisioned a backup instance from scratch on a new machine, which involved installing packages, environment setup, Apache, System and Application configuration, to ensure it runs reliably.

Mu-zero Technologies Pvt Ltd

Software Developer

MARCH 2021 - OCTOBER 2022

- Worked as a Full Stack Developer, creating an EdTech platform called Edumatica with ReactJS frontend and Node.js backend.

-
- Created a Marketplace feature that allows individual tutors to earn revenue by selling their courses on the platform.
 - Implemented academic features such as Assignments, a LaTeX-based Question Bank, and Interactive Worksheets. This allows institutes and tutors to create, assign, and share learning materials with students.
 - Developed an online library management system for better organization and easy access to physical books and e-books.
 - Extended the platform's features to support universities as well. Initial focus to support schools.
 - Fixed bugs regularly, made improvements, and refined features to boost stability, usability, and the overall quality of the application.

Alcodex Technologies, Kerala Startup Mission Kalamassery

Junior Software Developer

MARCH 2020 - FEBRUARY 2021

- Rebuilt an Air Quality Management web application. Migrated the frontend from Angular to React for easy maintenance and user experience enhancement.
- Rebuilt a Tower Strength Management web application. Delivered new features and improved the quality of the backend controller and the performance of database queries.
- Improved deployment practices, added new application features, improved backend controller logic and database query efficiency, and ensured proper documentation and testing.
- Handled server deployments based on client preferences. Ensured stable and reliable application environments. Performed ongoing maintenance and improvements of existing production applications.

EDUCATION

National Institute of Technology, Calicut

B.Tech Computer Science and Engineering

2014 - 2019

Savio Higher Secondary School, Devagiri

Higher Secondary

2012 - 2014

Bhavans vidyashram, Chelembra

High School

2007 - 2012

PROJECTS

Shekharam: React Web Application for Collection Enthusiasts

Application: <https://shekharam.netlify.app/>

GitHub link (frontend): <https://github.com/the-little-b0y/shekharam-frontend>

GitHub link (backend): <https://github.com/the-little-b0y/shekharam-backend>

Developed a responsive MERN-based web application for managing digital collections like stamps and coins, featuring QR code access to stored collections.

Implemented secure authentication with Google reCAPTCHA v3 and JWT-based authorization to block spam access and ensure safe data transmission. Integrated centralized API request logging with structured messages using Winston.

Deployed the application with a Node.js backend on Render, a React frontend on Netlify, and MongoDB Atlas as the database.

Bug Tracker: Role-Based Bug Tracking Web Application (CodeIgniter 4)

Application: <https://bug-tracker-anag.onrender.com/>

GitHub link: <https://github.com/the-little-b0y/bug-tracker>

Developed a CodeIgniter 4 based bug tracking web application that manages projects, teams, and bugs efficiently. Implemented user management, project assignment, and project team mapping. The application uses MVC architecture, conducts server-side validation, and enforces role-based access control.

Deployed on Render with a MySQL database hosted on Aiven.

Web Application for diagnosis of Retinopathy of Prematurity

Developed a web application for easy diagnosis Retinopathy of Prematurity, which is a major cause of blindness in premature infants. Early diagnosis of ROP is essential because prompt medical treatment can stop permanent retinal damage and lifelong vision loss in newborns. This project was created in partnership with Sankara Nethralaya Bangalore, ekLakshya Academy LLP Karnataka, and NIT Calicut. It was built on an existing image processing algorithm.

Online Library Management System

This project was developed as a part of the Database System course in college.

ACTIVITIES AND INTERESTS

Assistant Secretary, Industrial Planning Forum NITC.

Senior Executive, Light and Sound Proshow Committee - Tathva 2016, Ragam 2018.

Member of NITC Cultural Team, Street Play.

My hobbies include playing Piano and Ukulele.

DECLARATION

I hereby declare that the particulars given in this resume are true to the best of my knowledge and belief.
