SUMMARY

Passionate and adaptable Software Developer with hands-on experience in designing and developing responsive web applications using React.js, JavaScript, and modern front-end technologies. Skilled at building clean, reusable components, integrating RESTful APIs, and delivering seamless user experiences. Solid exposure to Python and Django for full-stack development. Familiar with Redux and Jest concepts and eager to deepen expertise in state management and automated testing. Strong team player with a proactive attitude towards problem-solving, performance optimization, and continuous learning.

SKILLS

- | | | | |
|----------------|------------------------|------------------|---------------------|
| • Nextjs | • Tanstack query | • Python | • Figma |
| • Reactjs | • Axios + interceptors | • Django | • Styled components |
| • Typescript | • Redux | • Rest framework | • HTML |
| • Javascript | • Zustand | • Strapi | • CSS |
| • Tailwind CSS | • React hooks | • Shadcn UI | • Agile methodology |

EDUCATION

Diploma in Computer Engineering
with 7.7 CGPA (3 Years)

2016 – 2019

EXPERIENCE

Senior Software Engineer at Tegain Private Limited

Jan, 2022 – Present

- Led frontend teams, participated in code reviews, task breakdown, mentoring fresh developers, and ensured development best practices.
- Developed and maintained dynamic web applications using React.js, improving user engagement and performance.
- Contributed to frontend architecture and implemented scalable UI solutions.
- Collaborate with cross-functional teams to ensure timely delivery of high-quality software.

PROJECTS

PACESS (medical eCommerce)

Full Stack Developer

- Developed a feature-rich medical e-commerce web application aimed at providing users with an efficient platform to purchase medical products and services.
- Integrated with payment gateways through Razorpay, support secure and efficient transactions.
- Built responsive and modular frontend components using React, ensuring a clean and user-friendly UI.
- Optimized application performance by reducing page load time, implementing code-splitting and caching strategies.
- Developed and maintained scalable REST APIs using Django, enabling smooth communication between frontend and backend services.

STARTUP SCHOOL

Frontend Lead

- Developed the frontend interface for an edtech platform that trains students to build startups while engaging them in real-world management activities.
- Secured the app with JWT authentication, implemented Axios interceptors for token refresh, added role-based access control, and ensured protected routes for sensitive data.
- Created reusable components to speed up development and maintain consistency.
- Collaborated with cross-functional teams for smooth integration and performance optimization

LMS (learners management system)

Fullstack Developer

- Developed a multi-university Learning & College Management platform enabling institutions to manage courses, specializations, subjects, exams, assignments, live classes, classrooms, and student EMIS.
- Built dedicated admin portals for each university to handle academic operations and data management.
- Designed student dashboards allowing learners to access study materials, submit assignments, view live class details, and attend exams online.
- Implemented role-based authentication and access control for secure data access across different user types.

Koko spices dashboard

Frontend Lead / Developer

- Built a dashboard using React, Tailwind CSS, Zustand (for state management), and TanStack Query (for data fetching).
- Covered key modules: Estate Management, Employee Management, Leave Requests, Warehouse, Store, Trips, and Accounts.
- Created reusable components and optimized the UI for better performance and easy maintenance.

Youngsta (eCommerce)

Frontend Lead / Developer

- Engineered the frontend of Youngsta, an eCommerce platform for seamless product browsing and purchasing.
- Integrated Stripe for secure payments and handled user authentication.
- Added metadata and SEO tags for every product to boost visibility.
- Built advanced product filters (by category, size, price, etc.) for a smoother shopping experience.

Findfirst (social media)

Frontend Lead / Developer

- Directed the frontend development of a social media platform for the construction industry.
- Secured the app with Google & Facebook login, JWT authentication, Axios interceptors, and reCAPTCHA for safe form submissions.
- Designed and built key social features – users can post, follow, like, comment, and apply to jobs, with advanced filters by category, following, location etc.
- Created an Admin Dashboard to manage all master data and set up a role-based login system for admins, constructors, contractors, guests etc.
- Expanded and maintained backend structure, ensuring the platform was scalable and reliable.
